SUBJECT: FEDERAL AUTONOMOUS VEHICLE LEGISLATION

STATUS: H.R. 3388 PASSED BY U.S. HOUSE OF REPRESENTATIVES
S. 1885 PASSED BY THE SENATE COMMITTEE ON
COMMERCE, SCIENCE AND TRANSPORTATION – PENDING
CONSIDERATION BY FULL SENATE

ACTION: WORK WITH AUTHOR

RECOMMENDATION

Staff recommends the Board of Directors adopt a Work With Author position on H.R. 3388 and S.1885 to ensure that the State of California, Los Angeles County and individual cities across Los Angeles County are able to appropriately regulate the operation of autonomous vehicles on their roadways to safeguard public safety.

ISSUE

Congress is working in both chambers to approve autonomous vehicle legislation that would set the stage for the continuing development of autonomous vehicles across the United States. While the Federal Government has jurisdiction over vehicle design, construction and performance, States and localities have jurisdiction over when, where and how autonomous vehicles operate. Both the House and the Senate bills contain sections providing federal preemption over State and local laws, which has raised concerns over the ability of States and local governments to control and ensure the safe operation of autonomous vehicles. An additional concern is that neither the House nor Senate bills address data sharing between the private sector and States and local governments.

DISCUSSION

As firms developing autonomous vehicles continue to develop and test Highly Autonomous Vehicles (HAV), it is important to establish clear guidelines that are uniform throughout the country in order to not stifle innovation in this new and growing industry. At the same time, it is important for States and local governments who will have HAVs being tested on their streets and highways be able to ensure the safety of the public as well as to regulate the operation of these new vehicles in an effective and efficient manner. Two bills have been considered in Congress have been drafted to establish uniform standards for autonomous vehicles. Congressman Robert Latta (R-OH) has authored H.R. 3388, the Safely Ensuring Lives Future Deployment and Research In Vehicle Evolution Act, or the SELF DRIVE Act. U.S. Senator John Thune

(R-SD) has authored S. 1885, the American Vision for Safer Transportation through Advancement of Revolutionary Technologies Act, or the AV START Act. Both the SELF DRIVE Act and the AV START Act provide for a process for research and require federal rulemaking on how autonomous vehicle manufacturers inform consumers of research outcomes. The SELF DRIVE Act has passed the U.S. House of Representatives and the AV START Act was favorably reported out of the Committee on Commerce, Science and Transportation and is currently awaiting consideration by the full Senate.

H.R. 3388 contains language preempting State and local laws that place an “unreasonable restriction” on design, construction and performance of HAVs. The term “performance” as it relates to motor vehicles or HAVs has not been defined in any statutes, regulations, or guidelines. Instead, the term performance is referenced in the definitions of “motor vehicle safety” and “motor vehicle standard” within Chapter 301 of the United States Code, which regulates motor vehicle safety. The National Highway Traffic Safety Administration (NHTSA) has been delegated the authority to regulate the safety, design and performance aspects of motor vehicles and motor vehicle equipment, and States continue to be responsible for regulating the human driver and vehicle operations. Because the HAV system is considered the “driver” in an HAV, there are circumstances in which States and local governments must regulate the in-use “performance” of the HAV system as the driver, rather than the equipment.

While S. 1885 initially included the exact same preemption language as H.R. 3388, the language was removed during the Committee markup. The Committee adopted an amendment that modified the bill by removing language specifically reserving for State and local governments the authority to regulate typically State and local concerns such as law enforcement and traffic laws. This language should be reinserted in S. 1885 and combined with the suggested clarification on the term performance before being passed by the Senate.

If H.R. 3388 and S. 1885 were amended to clearly state that the term performance, as it relates to preempting state laws, excludes all local and state traffic laws, States and local governments would be in a much stronger position to ensure public safety as it relates to the operation of autonomous vehicles on their roadways.

Another concern is that neither H.R. 3388 nor S. 1885 addresses data sharing between the private sector and States and local governments. Both bills should be modified to require private sector entities to share anonymized automated vehicle operation and performance data with State and local governments to ensure that States and local governments are able to ensure the safe operation of automated vehicles on our roadways.

DETERMINATION OF SAFETY IMPACT

Without properly addressing the issue of data sharing and defining the term “performance” and making clear that “performance” does not preempt or preclude continued enforcement of and compliance with local traffic laws, States and local

governments may not be able to effectively ensure the safe and efficient operation of Highly Autonomous Vehicles on local streets.

FINANCIAL IMPACT

There is no financial impact determined at this time.

ALTERNATIVES CONSIDERED

Our agency could consider the option of not being involved in the development of federal legislation with respect to autonomous vehicles. Metro staff does not recommend this alternative.

NEXT STEPS

Should the Board adopt a position to work with the authors on both bills, staff will communicate the Board's position to the authors and their professional staff and work to ensure that our Board-adopted recommendation is reflected in the final legislation Congress adopts with respect to autonomous vehicles. Staff will continue to keep the Board informed as this issue is addressed throughout the 115th Congress.

23 fect any law or regulation regarding registra-
24 tion, licensing, driving education and training,
25 insurance, la -

1 tions, safety and emissions inspections, conges-
2 tion management of vehicles on the street with-
3 in a State or political subdivision of a State, or

23 any time those priorities to address matters the
24 Secretary considers of greater priority. If the
25 Secretary makes such a change, the Secretary

1 shall complete an interim update of the priority
2 plan, make such update available to the public,
3 and submit such update to the Committee on
4 Energy and Commerce of the House of Rep-
5 resentatives and the Committee on Commerce,

14 coordination with State, local, and law enforcement agen-
15 cies, may develop a process for State and local entities
16 to provide information, on a voluntary basis, to the Sec-
17 retary to assist the Department of Transportation in iden-
18 tifying defects related to motor vehicle safety of highly
19 automated vehicles.

20 (c) CRASH DATA.—Not later than 3 years after the
21 date of the enactment of this Act, the Secretary shall re-
22 vise the crash investigation data collection system to in-
23 clude the collection of crash report data elements that dis-
24 tinguish whether the vehicle involved in a crash is a highly
25 automated vehicle, including the level of automation and

1 whether the vehicle was in automated mode at the time
2 of a crash.

3 **SEC. 14. CYBERSECURITY.**

4 (a) IN GENERAL.—Subchapter I of chapter 301 of
5 title 49, United States Code, as amended by section 9,
6 is further amended by adding at the end the following:

7 **“§ 30108. Cybersecurity risks to the safety of highly**
8 **automated vehicles**

9 “(a) DEFINITIONS.—In this section:

10 “(1) CYBERSECURITY INCIDENT.—The term
11 ‘cybersecurity incident’ has the meaning given the
12 term ‘incident’ in section 227(a) of the Homeland
13 Security Act of 2002 (6 U.S.C. 148(a)).

14 “(2) CYBERSECURITY RISK.—The term ‘cyber-
15 security risk’ has the meaning given the term in sec-
16 tion 227(a) of the Homeland Security Act of 2002
17 (6 U.S.C. 148(a)).

18 “(3) CYBERSECURITY VULNERABILITY.—The
19 term ‘cybersecurity vulnerability’ has the meaning
20 given the term ‘security vulnerability’ in section 102
21 of the Cybersecurity Information Sharing Act of
22 2015 (6 U.S.C. 1501).

23 “(b) CYBERSECURITY PLAN.—

24 “(1) IN GENERAL.—Each manufacturer of a
25 highly automated vehicle or automated driving sys-

1 tem shall develop, maintain, and execute a written
2 plan for identifying and reducing cybersecurity risks
3 to the motor vehicle safety of such vehicles and sys-
4 tems.

5 “(2) REQUIREMENTS.—The plan required
6 under paragraph (1) shall include a process for—

7 “(A) the risk-based prioritized identifica-
8 tion and protection of safety-critical vehicle con-
9 trol systems and the broader transportation
10 ecosystem, as applicable;

11 “(B) the efficient detection and response
12 to potential vehicle cybersecurity incidents in
13 the field;

14 “(C) facilitating expeditious recovery from
15 incidents as they occur;

16 “(D) the institutionalization of methods
17 for the accelerated adoption of lessons learned
18 across industry through voluntary exchange of
19 information pertaining to cybersecurity inci-
20 dents, threats, and vulnerabilities, including the
21 consideration of a coordinated cybersecurity
22 vulnerability disclosure policy or other related
23 practices for collaboration with third-party cy-
24 bersecurity researchers;

1 “(E) the identification of the point of con-
2 tact of the manufacturer with responsibility for
3 the management of cybersecurity;

4 “(F) the use of segmentation and isolation
5 techniques in vehicle architecture design, as ap-
6 propriate; and

7 “(G) supporting voluntary efforts by indus-
8 try and standards-setting organizations to de-
9 velop and identify consistent standards and
10 guidelines relating to vehicle cybersecurity, con-
11 sistent, and to the extent appropriate, with the
12 cybersecurity risk management activities de-
13 scribed in section 2(e) of the National Institute
14 of Standards and Technology Act (15 U.S.C.
15 272(e)).

16 “(3) INSPECTION.—The Secretary may inspect
17 any cybersecurity plan developed by a manufacturer
18 under this subsection to enable the Secretary to de-

21 scribed or order issued pursuant to this chapter.

22 “(4) PROTECTIONS FOR DISCLOSURE.—The
23 Secretary may, by notice and comment rulemaking,
24 establish a requirement that manufacturers subject

2 is suitable for public disclosure, as appropriate.

3 “(c) COORDINATED CYBERSECURITY VULNER-
4 ABILITY DISCLOSURE.—The Secretary may work coopera-
5 tively with manufacturers of highly automated vehicles
6 and automated driving systems to incentivize manufactur-
7 ers to voluntarily adopt a coordinated vulnerability disclo-
8 sure policy and practice in which a security researcher pri-
9 vately discloses information related to a discovered vulner-
10 ability to a manufacturer and allows the manufacturer
11 time to confirm and remediate the vulnerability—

12 “(1) so that manufacturers build relationships
13 with security researchers to mitigate cybersecurity
14 risks; and

15 “(2) to discover and mitigate cybersecurity
16 vulnerabilities in highly automated vehicles or auto-
17 mated driving systems that present a risk to motor
18 vehicle safety (as defined in section 30102 of title
