Agenda Number: 40.

EXECUTIVE MANAGEMENT COMMITTEE MAY 20, 2021

SUBJECT: 2021 PROGRESS REPORT ON THE METRO VISION 2028 STRATEGIC PLAN

ACTION: RECEIVE AND FILE

RECOMMENDATION

RECEIVE AND FILE the 2021 Progress Report on the Metro Vision 2028 Strategic Plan.

ISSUE

In 2018, Metro adopted a 10-year strategic plan - Metro Vision 2028 - to transform mobility in Los Angeles County. This Progress Report (Attachment A) takes stock of the progress to date in advancing the commitments of Vision 2028 and reaching the outcomes it was intended to achieve: a world class transportation system that enhances quality of life for all who live, work, and play within Los Angeles County. The report shares status updates on the actions called for in the strategic plan. The report is also a critical look into implementation challenges where renewed effort is needed, and opportunities that can help inform a future strategic plan update.

BACKGROUND

The structure of Vision 2028 provides a guide for assessing progress on a more granular level. Vision 2028 includes 5 major goals. Goals 1 and 2 cover the core of Metro's services. To transform how people travel in the county, Metro needs to improve and expand mobility options (Goal 1). Prioritizing the customer experience (Goal 2) is the best way to ensure that residents and workers understand how to use Metro's services as part of their journeys and have positive experiences. Goal 3 acknowledges that transportation is interwoven with many aspects of peoples' lives, and that Metro can and should improve social and economic opportunity. Goals 4 sets out commitments to lead and collaborate regionally and nationally. Finally, Goal 5 is about improving internal governance for maximum effectiveness.

DISCUSSION

Vision 2028 is serving as an effective guide to agency strategies and priorities. Metro has launched the majority of the actions contained in the strategic plan, which is a testament to all of the departments and business units involved in these steps, and the efforts of community-based organizations, advocates, and partners. Because many of these actions were initiated recently and

will take time to complete or operationalize, the full benefits have yet to be realized countywide. Three years is not enough time to stop and reverse one hundred years of policy, planning, and investment that have elevated and reinforced single-occupancy driving above all other forms of mobility. As the actions in the strategic plan advance and as synergies emerge between multiple initiatives, the needle will move incrementally towards a multi-modal Los Angeles County, a place where more people live close to high quality mobility options and where buses have priority and travel faster than today. Vision 2028 will continue to map Metro towards world class transportation, while providing the flexibility for the agency to adjust tactics as needed.

Vision 2028 includes 75 actions that flesh out these five overarching goals. The majority of the 75 actions are underway. Metro has also launched a number of new efforts since adopting Vision 2028 that are supportive of the overall mission and responsive to the evolving context in the County. These include pathbreaking efforts like the Fareless System Initiative, COVID-19 Recovery Task Force, and the transit Public Safety Advisory Committee.

The multitude of initiatives that Metro has launched or completed are merely milestones along the way to achieving the Vision 2028 outcomes - the ultimate measures of success. Success is about doubling the share of non-solo driving trips, increasing bus speeds by 30%, ensuring everyone is within a 10-minute walk or roll to mobility services and need not have to wait more than 15 minutes any time of the day, and having ways to bypass congestion. These are ambitious targets.

Three years in, Metro has yet to adequately bend the curve on these outcomes. This is to be expected in the context of a 10-year strategy. Shifting longstanding countywide transportation patterns will take time. For context, between 2010 and 2019, the share of single-occupant vehicle commute trips increased by 2 percentage points to 74 percent, while transit trips declined from 7 percent to 6 percent. The magnitude of the challenge has only increased with the effects of the covid-19 pandemic, which has altered near-term travel behavior and demand for the different modes. The aggressive schedule makes it even more crucial for Metro to maintain its focus on advancing the strategic plan's commitments. Metro also needs to gather and acquire better data to develop a comprehensive baseline and track movement of the visionary outcomes. The status of each goal is summarized as follows:

Goal 1: Provide high quality mobility options that enable people to spend less time traveling

To improve mobility for all, Metro has increasingly centered equity by creating an Office of Equity and Race and developing equity tools to help guide budgeting and decision-making. Metro has elevated bus service via the NextGen Bus Plan and Better Bus Program. Metro launched the Traffic Reduction Study to explore the feasibility of a pilot program that would use congestion pricing to manage traffic in combination with additional high-quality mobility options. Metro piloted on-demand transit and incorporated lessons in a new Metro Micro on-demand service. These steps are in addition to the ongoing planning and construction of multiple rail, bus rapid transit (BRT), active transportation, and highway projects.

Vision 2028 acknowledged that completing more capital projects is necessary but not sufficient to achieve better mobility. Mobility needs to be planned and delivered as a system of interlocking parts, mutually supportive of one another. The Long Range Transportation Plan provides a balanced and

comprehensive approach to addressing the county's mobility needs with expected resources. The agency's NextGen Bus Plan has demonstrated the benefits of a holistic network-based approach. A similar mindset should be considered for planning the rail network, accommodating bicycles, walking, and other personal mobility devices on the transportation network, the arterial and highway network, and regional land use patterns - these efforts should be layered into a mobility system of interlocking parts.

Goal 2: Deliver outstanding trip experience for all users of the transportation system

A world class transportation system must meet the needs of each customer who travels to work, home, school, and other destinations. Metro is putting the customer first by placing a high priority on making its mobility services attractive, affordable, efficient, safe, convenient, comfortable, and easy to use. Metro established the Customer Experience team in the Office of the CEO and adopted the agency's first Customer Experience Plan. The purpose of the Customer Experience Plan is to take an honest look at pain points that customers tell us about, and to make improvements that are responsive to their concerns. Metro will update the Customer Experience Plan annually to track progress and drive investment in improvements for customers.

Safety and security of the transit experience is of paramount concern for Metro and the broader community. Metro convened the Public Safety Advisory Committee (PSAC) to help re-imagine Metro's approach to public safety on the transit system. PSAC will help guide new initiatives, including the deployment of unarmed transit ambassadors and flexible dispatch of social workers instead of relying solely on law enforcement.

The Integrated Station Design Standards Working Group has undertaken highly coordinated, cross-departmental, and comprehensive efforts to update station design standards and test new customer amenities for station public areas. The goal of these efforts are to create state-of-art customer environments that are safe, accessible, well-maintained and sustainable, and that reflect global transit station design best practices.

The care and commitment to the diverse needs of customers and their experiences form the new baseline standard at Metro. Fully implementing the Customer Experience Plan, enhancing bus frequencies, making transit fareless, implementing the future recommendations of the PSAC, and narrowing the state of good repair backlog will require Metro to make difficult choices to identify new sources of sustainable funding for operations and potentially reallocating existing fund sources towards these priority needs.

Goal 3: Enhance communities and lives through mobility and access to opportunity

Transportation is much more than buses, trains, and roads; it is a means to strengthening communities and connecting them to each other. Physical mobility unlocks social mobility and economic opportunities. From developing pathways for local careers in transportation to fostering equitable development on transit corridors, Metro can help uplift communities and confront the crises of housing affordability and regional homelessness. Pathbreaking initiatives like WIN-LA, SEED School, Transit-Oriented Communities Implementation Plan, Joint Development policy, and homelessness outreach teams are making a difference at the community level.

Zooming out to look at the region as a whole, greater attention must be paid to where people and jobs are strategically located in relation to the region's transportation system. Aligning regional land use patterns and transportation planning sets the foundation for robust transit ridership growth and decreased dependence on solo driving. World class transportation requires well-planned land use, with a focus on the transportation demands it generates, and Metro should play a role in both.

Goal 4: Transform LA County through regional collaboration and national leadership

Leadership is in large part about bringing diverse interests to the table, creating the conditions for consensus and for leaders to step forward, and holding each other to account. The NextGen Bus Speed Engineering Working Group is an example of Metro working in partnership with the Los Angeles Department of Transportation to accelerate the implementation of bus lanes and realize the full benefits of the bus network restructuring under the NextGen Bus Plan. The Freight Working Group is another leading example of Metro convening diverse public, private, and community-based interests to shape a vision for regional goods movement that will take into greater account environmental and equity objectives.

Another component of leadership is to inspire and push for change to policy agendas at the agency, state, regional, and national levels. Metro has taken a first step towards modernizing its highway funding programs to support complete streets. Metro has supported state policy change to allow more flexible planning of many transit and active transportation projects. When called upon, Metro has stepped up to serve in national efforts to respond to the COVID-19 pandemic and the federal administration.

Regional leadership is even more important as the County emerges from the COVID-19 pandemic and economic downturn, and turns its attention to other crises, including climate change. Ambitious action is required at all levels of government, of the private sector, and by individuals. Metro can play a leading role by prioritizing investments and policies based on reducing county-wide vehicle miles travelled. As for other challenges-from managing traffic congestion to integrating regional land use and transportation - a medium-term legislative strategy can help improve the policy environment to make it easier for Metro to reach its goals.

Goal 5: Provide responsive, accountable, and trustworthy governance within the Metro organization

Metro embraces its responsibilities as transit operator relied upon by many essential workers, and as a steward of funding generated by local taxpayers and from grants awarded by the state and federal governments. This is why Metro is constantly looking at ways to deliver better value for the travelling public. Metro's Office of Extraordinary Innovation has provided an open door to harness the knowhow and expertise of the private and non-profit sectors for the public good.

The visionary outcomes in Vision 2028 will, however, be harder to achieve until there is closer internal alignment of the agency with the strategic plan. This can include a centralized hub to coordinate basic data collection and planning analytics so that decision-makers have ready access to crucial information to aid deliberations. It also includes ways to accelerate the retention of institutional knowledge and creating leadership pathways to counteract a rapidly aging workforce and shrinking labor pool.

On the fiscal front, a true alignment of the organization to Vision 2028 means delivering to the Board a unified medium-term financial strategy in a Short Range Transportation Plan that shows the match between funding levels and investment needs. It will aid Metro in managing and prioritizing the resources that Metro is charged with stewarding. Attention must be paid to exploring best practices to assess the full life-cycle costs of major capital projects and to maximize their benefits from planning to construction to operations, and to address the increasing backlog of state of good repair needs.

FINANCIAL IMPACT

Receiving and filing the 2021 Progress Report on the Metro Vision 2028 Strategic Plan has no financial impact.

IMPLEMENTATION OF STRATEGIC PLAN GOALS

Receiving and filing the 2021 Progress Report on Metro Vision 2028 Strategic Plan supports all five goals of Vision 2028.

NEXT STEPS

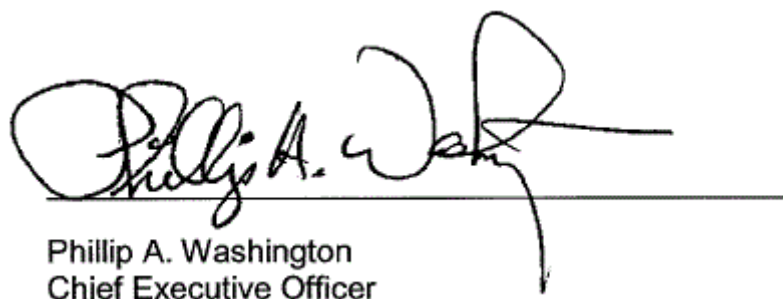

A final copy of the 2021 Progress Report will be published and distributed across Metro's various communication channels in Summer 2021.

**2021 PROGRESS REPORT on the
METRO VISION 2028 STRATEGIC PLAN**

DRAFT

CEO Letter

Dear LA County Communities,

Three years ago, the Los Angeles County Metropolitan Transportation Authority (Metro), its stakeholders, and Los Angeles County residents came together and crafted Vision 2028, Metro's ambitious 10-year strategic plan that set us on a path to achieve world class transportation and advance opportunity for everyone in LA County. Vision 2028 recognizes that mobility is a cornerstone to success and quality of life. Transportation connects people to education, housing, jobs, healthcare, community and commerce. It is through this lens that Metro has continued to enhance our services and launch new and innovative initiatives.

As my six-year term serving as Metro's CEO draws to a close, I invite you to examine the strides that we have made together. This report assesses the progress we have made toward Vision 2028 goals and is honest about opportunities for improvement. We have accomplished a lot; and none of it could have been achieved without our communities and partners, our talented Metro staff and our Board of Directors.

I am proud of all that we have done in the first three years of implementing Vision 2028. We are taking concrete steps to center equity in everything we do. We have deepened our commitment to the bus as the workhorse of our transit system. We have continued to build for the future by expanding the rapid transit network. We have put the customer at the heart of all our work for improving access, safety, and reliability. We have begun exploring bold approaches to address gridlock, such as congestion pricing to manage traffic, so that streets can function more effectively for people, whether they choose to take transit, walk, bicycle, drive, or use other ways to get around.

We have piloted innovative on-demand mobility services to complement our extensive bus and rail network. We have created opportunities for underserved communities, small businesses, and partner jurisdictions to work together with us. We have joined forces with Los Angeles County to help the unsheltered and with local jurisdictions to shape transit-oriented communities. We have prioritized workforce development and diversity, and the creation of career pathways to train current and future generations for high-demand transportation jobs.

We have opened the door for the private and non-profit sectors to suggest innovative ideas through unsolicited proposals. We have secured federal and state funding to amplify our local revenues, and helped pass legislation that gives us more flexibility in planning and delivering transit and active transportation projects. I am especially proud of the progress we have made to position fareless transit as a means to lift the transportation cost burden off so many of our transit customers.

I think it's important to celebrate our accomplishments, but it's equally important to recognize where Metro and our partners have more work to do. In introducing Vision 2028, I wrote that, "The transportation challenges in the Southern California region require bold action." It will take more than three years to shift away from a century of car-oriented policies and to eliminate deep-rooted disparities in access to opportunity. By recognizing these remaining barriers – some of which have lived in our blind spots for decades – and realizing the opportunities, this report will keep all of us forthright and focused on our mission. There are no shortcuts on the path to world class transportation.

Metro's mission to support the transportation needs and regional growth of LA County continues. I know this agency, 11,000 strong, will succeed in its mission. The solid progress to date is made possible by our united

effort and shared focus on achieving the goals laid out in Vision 2028. Dedication to our daily work, from the frontline operators and mechanics to the office staff in One Gateway, along with engagement in public processes, productive partnerships and continuous innovation have produced the achievements described in this report.

I am honored to have had the privilege to be your leader these past six years, you will always have me as your advocate.

Sincerely,

Phillip A. Washington

Executive Summary

In 2018, Metro adopted a 10-year strategic plan – Metro Vision 2028 – to transform mobility in Los Angeles County. This report takes stock of the progress to date in advancing the commitments of Vision 2028 and reaching the outcomes it was intended to achieve: a world class transportation system that enhances quality of life for all who live, work, and play within Los Angeles County. The premise of Vision 2028 is that Metro will need to pursue multiple tactics to advance this mission. The report shares status updates on the actions called for in the strategic plan. The report is also a critical look into implementation challenges where renewed effort is needed, and opportunities that can help inform a future strategic plan update. Three years into Vision 2028, what has Metro accomplished, and what remains to be done?

Vision 2028 is serving as an effective guide to agency strategies and priorities. Metro has launched the majority of the actions contained in the strategic plan, which is a testament to all of the departments and business units involved in these steps, and the efforts of community-based organizations, advocates, and partners. Because many of these actions were initiated recently and will take time to complete or operationalize, the full benefits have yet to be realized countywide. Three years is not enough time to stop and reverse one hundred years of past policy, planning, and investment that have elevated and reinforced solo driving above all other forms of mobility. As the actions in the strategic plan advance and as synergies emerge between multiple initiatives, the needle will move incrementally towards a multi-modal Los Angeles County, a place where more people live close to high quality mobility options and where public transit vehicles have priority on roadways and travel faster than today. Vision 2028 also provides flexibility for the agency to adjust tactics as needed.

The structure of Vision 2028 provides a guide for assessing progress on a more granular level. Vision 2028 includes 5 major goals. Goals 1 and 2 cover the core of Metro's services. To transform how people travel in the county, Metro needs to improve and expand mobility options (Goal 1). Prioritizing the customer experience (Goal 2) is the best way to give residents an experience that is worthy of not driving. Goal 3 acknowledges that transportation is interwoven with many aspects of peoples' lives, and that Metro can and should improve social and economic opportunities. Goal 4 sets out commitments to lead and collaborate regionally and nationally. Finally, Goal 5 is about improving internal governance for maximum effectiveness.

Vision 2028 includes 75 actions, the majority of which are underway. Metro has also launched a number of new efforts since adopting Vision 2028 that are supportive of the overall mission and responsive to the evolving context in the County. These include pathbreaking efforts like the Fareless System Initiative, COVID-19 Recovery Task Force, and the transit Public Safety Advisory Committee.

The multitude of initiatives that Metro has launched or completed are merely milestones along the way to achieving the Vision 2028 outcomes – the ultimate measures of success. Success is about doubling the share of non-solo driving trips, increasing bus speeds by 30%, ensuring everyone is within a 10-minute walk or roll to mobility services and need not have to wait more than 15 minutes any time of the day, and having ways to bypass congestion. These are ambitious targets.

Three years in, Metro has **yet** to adequately bend the curve on these outcomes. This is to be expected in the context of a 10-year strategy. Shifting longstanding countywide transportation patterns will take time. For context, between 2010 and 2019, the share of single-occupant vehicle commute trips increased by 2 percentage points to 74 percent, while transit trips declined from 7 percent to 6 percent. The magnitude of the challenge has only increased with the effects of the covid-19 pandemic, which has altered near-term travel behavior and

demand for the different modes. The aggressive schedule of Vision 2028 makes it even more crucial for Metro to maintain its focus on advancing the strategic plan's commitments. Metro also needs to gather and acquire better data to develop a comprehensive baseline and track movement of the visionary outcomes. The status of each goal is summarized as follows:

Goal 1: Provide high quality mobility options that enable people to spend less time traveling

To improve mobility for all, Metro has increasingly centered equity by creating an Office of Equity and Race and developing equity tools to help guide budgeting and decision-making. Metro has elevated bus service via the NextGen Bus Plan and Better Bus Program. Metro launched the Traffic Reduction Study to explore the feasibility of a pilot program that would use congestion pricing to manage traffic in combination with additional high-quality mobility options. Metro piloted on-demand transit and incorporated lessons in a new Metro Micro on-demand service. These steps are in addition to the ongoing planning and construction of multiple rail, bus rapid transit (BRT), active transportation, and highway projects.

Vision 2028 acknowledged that completing more capital projects is necessary but not sufficient to achieve better mobility. Mobility needs to be planned and delivered as a system of interlocking parts, mutually supportive of one another. The Long Range Transportation Plan provides a balanced and comprehensive approach to addressing the county's mobility needs with expected resources. The agency's NextGen Bus Plan has demonstrated the benefits of a holistic network-based approach. A similar mindset should be considered for planning the rail network, accommodating bicycles, walking, and other personal mobility devices on the transportation network, the arterial and highway network, and regional land use patterns – these efforts should be layered into a mobility system of interlocking parts.

Goal 2: Deliver outstanding trip experience for all users of the transportation system

A world class transportation system must meet the needs of each customer who travels to work, home, school, and other destinations. Metro is putting the customer first by placing a high priority on making its mobility services attractive, affordable, efficient, safe, convenient, comfortable, and easy to use. Metro established the Customer Experience team in the Office of the CEO and adopted the agency's first Customer Experience Plan. The purpose of the Customer Experience Plan is to take an honest look at pain points that customers tell us about, and to make improvements that are responsive to their concerns. Metro will update the Customer Experience Plan annually to track progress and drive investment in improvements for customers.

Safety and security of the transit experience is of paramount concern for Metro and the broader community. Metro convened the Public Safety Advisory Committee (PSAC) to help re-imagine Metro's approach to public safety on the transit system. PSAC will help guide new initiatives, including the deployment of unarmed transit ambassadors and flexible dispatch of social workers instead of relying solely on law enforcement.

The Integrated Station Design Standards Working Group has undertaken highly coordinated, cross-departmental, and comprehensive efforts to update station design standards and test new customer amenities for station public areas. The goal of these efforts is to create state-of-art customer environments that are safe, accessible, well-maintained and sustainable, and that reflect global transit station design best practices.

The care and commitment to the diverse needs of customers and their experiences form the new baseline standard at Metro. Fully implementing the Customer Experience Plan, enhancing bus frequencies, making transit fareless, implementing the future recommendations of the PSAC, and narrowing the state of good repair backlog will require Metro to make difficult choices to identify new sources of sustainable funding for operations and potentially reallocating existing fund sources towards these priority needs.

Goal 3: Enhance communities and lives through mobility and access to opportunity

Transportation is much more than buses, trains, and roads; it is a means to strengthening communities and connecting them to each other. Physical mobility unlocks social mobility and economic opportunities. From developing pathways for local careers in transportation to fostering equitable development on transit corridors, Metro can help uplift communities and confront the crises of housing affordability and regional homelessness. Pathbreaking initiatives like WIN-LA, SEED School, Transit-Oriented Communities Implementation Plan, Joint Development policy, and homelessness outreach teams are making a difference at the community level.

Zooming out to look at the region as a whole, greater attention must be paid to where people and jobs are strategically located in relation to the region's transportation system. Aligning regional land use patterns and transportation planning sets the foundation for robust transit ridership growth and decreased dependence on solo driving. World class transportation requires well-planned land use, with a focus on the transportation demands it generates, and Metro should play a role in both.

Goal 4: Transform LA County through regional collaboration and national leadership

Leadership is in large part about bringing diverse interests to the table, creating the conditions for consensus and for leaders to step forward, and holding each other to account. The NextGen Bus Speed Engineering Working Group is an example of Metro working in partnership with the Los Angeles Department of Transportation to accelerate the implementation of bus lanes and realize the full benefits of the bus network restructuring under the NextGen Bus Plan. The Freight Working Group is another leading example of Metro convening diverse public, private, and community-based interests to shape a vision for regional goods movement that will take into greater account environmental and equity objectives.

Another component of leadership is to inspire and push for change to policy agendas at the agency, state, regional, and national levels. Metro has taken a first step towards modernizing its highway funding programs to support complete streets. Metro has supported state policy change to allow more flexible planning of many transit and active transportation projects. When called upon, Metro has stepped up to serve in national efforts to respond to the COVID-19 pandemic and the federal administration.

Regional leadership is even more important as the County emerges from the COVID-19 pandemic and economic downturn, and turns its attention to other crises, including climate change. Ambitious action is required at all levels of government, of the private sector, and by individuals. Metro can play a leading role by prioritizing investments and policies based on reducing county-wide vehicle miles travelled. As for other challenges—from managing traffic congestion to integrating regional land use and transportation – a medium-term legislative strategy can help improve the policy environment to make it easier for Metro to reach its goals.

Goal 5: Provide responsive, accountable, and trustworthy governance within the Metro organization

Metro embraces its responsibilities as transit operator relied upon by many essential workers, and as a steward of funding generated by local taxpayers and from grants awarded by the state and federal governments. This is why Metro is constantly looking at ways to deliver better value for the travelling public. Metro's Office of Extraordinary Innovation has provided an open door to harness the knowhow and expertise of the private and non-profit sectors for the public good.

The visionary outcomes in Vision 2028 will, however, be harder to achieve until there is closer internal alignment of the agency with the strategic plan. This can include a centralized hub to coordinate basic data collection and planning analytics so that decision-makers have ready access to crucial information to aid deliberations. It also includes ways to accelerate the retention of institutional knowledge and creating leadership pathways to counteract a rapidly aging workforce and shrinking labor pool.

On the fiscal front, a true alignment of the organization to Vision 2028 means delivering to the Board a unified medium-term financial strategy in a Short Range Transportation Plan that shows the match between funding levels and investment needs. It will aid Metro in managing and prioritizing the resources that Metro is charged with stewarding. Attention must be paid to exploring best practices to assess the full life-cycle costs of major capital projects and to maximize their benefits from planning to construction to operations, and to address the increasing backlog of state of good repair needs.

Background on Metro Vision 2028

Residents and workers in Los Angeles County have long contended with significant barriers to mobility and access, including traffic congestion, dispersed land uses, and sparse affordable housing. These daily struggles stand in contrast to the region’s global image of dynamism, diversity, and vitality. Imagining that Los Angeles County could be as good as or better than any other place in the nation, or even the world, for transportation options and mobility outcomes, the Metro Board adopted Metro Vision 2028 – the 10-year strategic plan – in 2018. This report takes stock of the progress to date in advancing the commitments of Vision 2028. It identifies success stories and areas where renewed efforts or adjustments are necessary for shaping a better transportation system in Los Angeles County.

Vision 2028 is a performance-based plan. Measuring performance is the only way to know whether Metro and the County are moving in the right direction. Where data is available, they are used to measure performance. Where data is lacking, efforts will be redoubled to collect the right data in a timely manner.¹

The Progress Report should be reviewed in the context of the three-year period since the strategic plan was adopted. During this time, many of the strategic plan’s actions have been initiated. The COVID-19 pandemic has dramatically altered travel demand and patterns at least in the short-term. Measurable changes in long-term travel behavior take time to monitor, given the scale of the largest county in the nation. Within this context, the Progress Report focuses on the status of the commitments set out in Vision 2028.

Vision 2028:

Metro’s mission is to provide a world class transportation system that enhances quality of life for all who live, work, and play within LA County.

Metro’s vision is composed of three elements that help define the benefits that world-class transportation will foster:

- *Increased prosperity for all by removing mobility barriers;*
- *Swift and easy mobility throughout LA County, anytime; and*
- *Accommodating more trips through a variety of high-quality mobility options.*

A world class transportation system means taking steps to achieve the following outcomes:

- *Doubling the percent usage of transportation modes other than solo driving, including taking transit, walking, cycling, sharing rides, and carpooling*
- *Ensuring that all County residents have access to high-quality mobility options within a 10-minute walk or roll from home*
- *Reducing maximum wait times for any trip to 15 minutes during any time of day*
- *Improving average travel speeds on the County’s bus network by 30%*
- *Providing reliable and convenient options for users to bypass congestion*

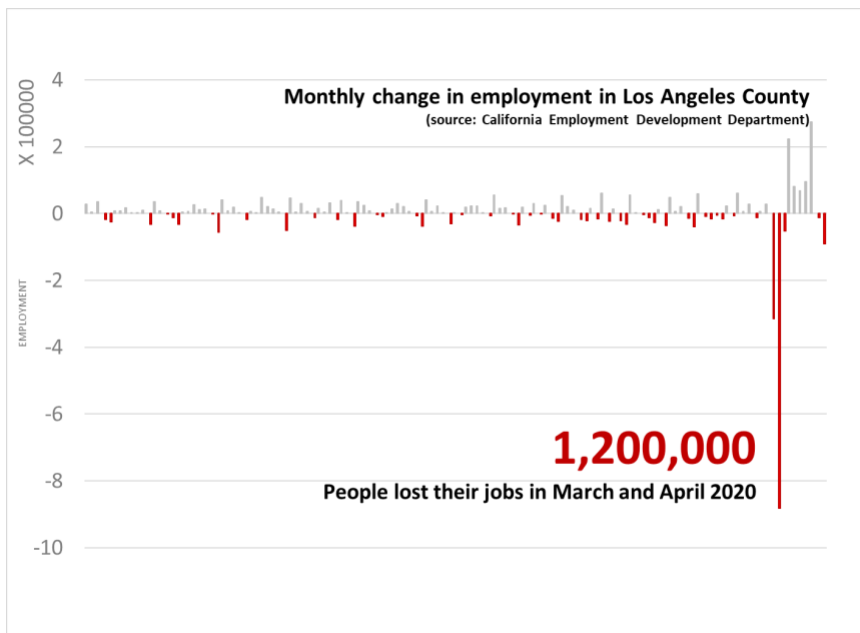

¹ Metro’s policy documents contain a wide range of performance measures that will be monitored and reported out in future progress reports, such as the Customer Experience Plan, Long Range Transportation Plan, and Moving Beyond Sustainability Plan.

Los Angeles County, 2018 - 2021

By any measure, providing mobility and access for all in the 4,100 square mile area of Los Angeles County is a tall order. The region’s dependence on the car remains stubbornly high. The share of commute trips that is not solo driving remains below 30 percent. LA Metro’s transit ridership reached a recent high of 478 million rides in 2013, then declined to 370 million by the end of 2019. Compounding these challenges are regional homelessness and the severe affordable housing crisis in the County. Setting a goal of delivering world class transportation options for all will mean bending and, ultimately, reversing the trajectories of these trends.

Few would have predicted at the time the strategic plan was adopted in 2018 that by the end of 2020, a microscopic virus with a global reach will have taken the lives of over 10,000 Los Angeles County residents, caused 600,000 residents to lose their jobs, and dragged transit ridership down to levels not seen since the 1970s.²

The first two months of the Safer at Home orders produced the biggest shocks to the economy and mobility in Los Angeles County: over a million residents lost their jobs, and Metro’s transit ridership plunged by nearly 20,000,000 boardings.

² 23,479 Los Angeles County residents have succumbed to COVID-19 as of April 12, 2021: <https://www.latimes.com/projects/california-coronavirus-cases-tracking-outbreak/los-angeles-county/>

Even in the darkest hours of the pandemic, Vision 2028 provided a reliable guidepost that Metro’s mission had not changed – to strive for a world class transportation system for the 10 million residents of Los Angeles County. The strategic plan’s flexible approach, with multiple tactics adding up to broad transportation improvements, enabled the agency to pivot to prioritizing safety and essential travel for Metro riders.

Metro was able to respond quickly and nimbly by

- maintaining a level of transit service to meet demand for essential trips,
- maintaining physical distance between bus operators and customers through the suspension of fare payment and introduction of rear door boarding,
- stepping up station and vehicle cleaning regimens,
- securing a robust supply of personal protection equipment to protect front line staff and distributing masks to customers,
- mobilizing a Recovery Task Force to identify actions that Metro could take in the near- and medium-term to recover from the pandemic with equity and congestion reduction objectives intact.

In the face of a rapidly changing financial reality in late Spring 2020, Metro embraced a ‘mission critical’ position, determining which services, projects, and initiatives to move forward and which to pause. Strategic initiatives essential to Vision 2028 persevered, including Measure R and M projects already in construction, the Long Range Transportation Plan update, the NextGen Bus Plan, implementation tools for the Equity Platform, the Customer Experience Plan, the Moving Beyond Sustainability Plan, and the ground-breaking for the SEED School.

2020 was also the year that Black Lives Matter turned into a global movement for change. Los Angeles County was one of the many epicenters of peaceful protests and civil unrest. These events have reinforced the unique role that Metro has embraced in bridging the geographic gaps to economic opportunity, uplifting communities, creating employment pathways for historically underrepresented groups, and evolving its practices in public safety and security.

At the time of preparing this Progress Report, the public health crisis is turning a corner as an increasing proportion of residents complete their vaccinations and businesses begin to reopen. Vision 2028 positions

Metro to bring back better mobility. The challenges documented in Vision 2028 still remain valid today but the types and levels of effort required to reverse the long-term trends in mobility and access deserve scrutiny. Adjustments to existing commitments, and the pursuit of new commitments, may be necessary to fit the post-pandemic context of economic recovery and resilience. A critical first step is to take stock of the progress to date in implementing Vision 2028, and to assess the challenges and possibilities ahead.

UNDERSTANDING THE PROGRESS REPORT

The Progress Report follows the structure of the strategic plan.

GOAL 1: Provide high-quality mobility options that enable people to spend less time traveling.
INITIATIVE 1.1: To expand the transportation network and increase mobility for all users, Metro will:
<ul style="list-style-type: none"> • Target infrastructure and service investments toward those with the greatest mobility needs. • Expand the transportation system as responsibly and quickly as possible.
INITIATIVE 1.2: To improve LA County’s overall transit network and assets, Metro will:
<ul style="list-style-type: none"> • Invest in a world-class bus system that is reliable, convenient, and attractive to more users for more trips. • Partner with Metrolink to increase the capacity of the regional transportation system. • Optimize the speed, reliability, and performance of the existing system by revitalizing and upgrading Metro’s transit assets. • Improve connectivity to provide seamless journeys. • Improve safety on the transit system and reduce roadway collisions and injuries.
INITIATIVE 1.3: To manage transportation demand in a fair and equitable manner, Metro will:
<ul style="list-style-type: none"> • Develop simplified, sustainable, and comprehensive pricing policies to support the provision of equitable, affordable, and high-quality transportation services. • Implement the ExpressLanes Tier 1 network within the next ten years. • Test and implement pricing strategies to reduce traffic congestion. • Manage congestion and reduce conflicts between the movement of goods and people on streets and highways. • Explore opportunities for expanding access to shared, demand-responsive transportation options for everyone.
GOAL 2: Deliver outstanding trip experiences for all users of the transportation system.
INITIATIVE 2.1: Metro is committed to improving security.
INITIATIVE 2.2: Metro is committed to improving legibility, ease of use, and trip information on the transit system.
INITIATIVE 2.3: Metro will improve customer satisfaction at all customer touch points.
GOAL 3: Enhance communities and lives through mobility and access to opportunity.
INITIATIVE 3.1: To lift up local communities, Metro will create jobs and career pathways in transportation.
INITIATIVE 3.2: Metro will leverage its transit investments to catalyze transit-oriented communities and help stabilize neighborhoods where these investments are made.
INITIATIVE 3.3: Metro is committed to genuine public and community engagement to achieve better mobility outcomes for the people of LA County.
INITIATIVE 3.4: Metro will play a strong leadership role in efforts to address homelessness in LA County.
GOAL 4: Transform Los Angeles County through regional collaboration and national leadership.
INITIATIVE 4.1: Metro will work with partners to build trust and make decisions that support the goals of the Vision 2028 Plan.
INITIATIVE 4.2: Metro will help drive mobility agendas, discussions, and policies at the state, regional, and national levels.
GOAL 5: Provide responsive, accountable, and trustworthy governance within the Metro organization.
INITIATIVE 5.1: Metro will leverage funding and staff resources to accelerate the achievement of goals and initiatives prioritized in this Vision 2028 Plan.
INITIATIVE 5.2: Metro will exercise good public policy judgment and sound fiscal stewardship.
INITIATIVE 5.3: Metro will develop a transparent data management policy that addresses open data, data storage, and data protections.
INITIATIVE 5.4: Metro will apply prudent commercial business practices to create a more effective agency.
INITIATIVE 5.5: Metro will expand opportunities for businesses and external organizations to work with us.
INITIATIVE 5.6: Metro will foster and maintain a strong safety culture.
INITIATIVE 5.7: Metro will build and nurture a diverse, inspired, and high-performing workforce.

Each chapter begins with a description of the goal. The ‘Progress at a Glance’ provides a big picture view of overall progress. The series of questions that headline subsequent sections asks the agency how Metro is doing in meeting each of its Vision 2028 commitments. The challenges and opportunities section assesses the work within today’s conditions.

The *Summary of Strategic Opportunities* chapter:

This section summarizes the strategic opportunities identified within each goal chapter. Further dialogue will be required in most instances before action can be taken. The future update to Vision 2028 is an appropriate place to deliberate these possibilities.

The *Status of Actions* chapter:

This chapter summarizes the status of the 75 actions in Vision 2028’s action matrix and new actions that have been initiated or completed since 2018. While they are not the only actions that help advance the goals of the strategic plan, they are important commitments shared across the organization.

The *World Class Transportation* chapter:

This chapter shows examples of the possibilities should the vision and goals laid out in the strategic plan are realized. A number of performance achievements are shown from around the world in relation to Los Angeles County.

Given the breadth of Metro’s work, the Progress Report provides only a snapshot of the status of the commitments in Vision 2028. Metro documents listed in the Glossary provide a richer spectrum of Metro’s efforts toward delivering a world class transportation system.

Progress on the Visionary Outcomes

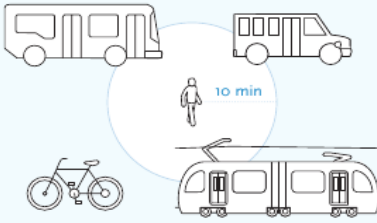

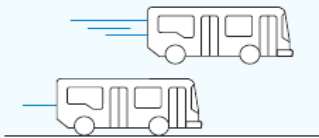

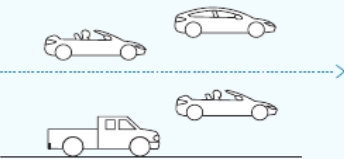

Achieving the Vision 2028 Visionary Outcomes will require a long-term commitment across the entire agency, and the support of Metro’s partners and the travelling public.

- *Doubling the percent usage of transportation modes other than solo driving, including taking transit, walking, cycling, sharing rides, and carpooling*
- *Ensuring that all County residents have access to high-quality mobility options within a 10-minute walk or roll from home*
- *Reducing maximum wait times for any trip to 15 minutes during any time of day³*
- *Improving average travel speeds on the County’s bus network by 30%*
- *Providing reliable and convenient options for users to bypass congestion*

The magnitude of the challenge is best exemplified by the trend prior to COVID-19: Between 2010 and 2019, the share of single-occupant vehicle commute trips increased by 2 percentage points, while transit trips declined from 7 percent to 6 percent.⁴ The pandemic has, at least in the near term, altered travel behavior and demand. Recovery may look very different depending on the mode. Continued monitoring is key to determining the lasting impacts of the pandemic on economic activity. Metro is preparing to create a baseline of how people travel throughout LA County and to track progress towards the mode shift target in Vision 2028. Additional data sources and analysis will help measure whether and how transportation service shifts and new mobility options achieve the other visionary outcomes on access, wait time, and travel speeds. As these data sources come on line and are tested, Metro will make them open and accessible to the public.

VISION Double the percent usage of transportation modes other than driving alone, including taking transit, walking, biking, ridesharing, and carpooling.

Metro’s Visionary Outcomes by 2028

- 10-minute walk or roll to high-quality mobility options**

- 15-minute maximum wait, any time of day**

- 30% faster bus speeds**

- Options to bypass congestion**

³ 15-minute wait time for all transportation options, including transit

⁴ American Community Survey

Progress on Goal 1

Provide high-quality mobility options that enable people to spend less time travelling

Provide high-quality mobility options that enable people to spend less time traveling.

To achieve this goal, Metro will expand transportation options, improve the quality of its transit network and assets, and take steps to manage demand on the entire network. This includes leveraging resources and influence and working with public and private sector partners to provide a transportation system that is easy, convenient, and reliable for all users. Increased use of high-capacity mass transit, walking, bicycling and ridesharing will allow the existing network to accommodate more trips while providing a higher level of mobility for residents and businesses.

Progress at a Glance:

Metro understands that delivering world class transportation in Los Angeles County will be a journey of many steps. Since 2018, these steps have included centering equity as a core decision-making lens, establishing the Equity and Race team in the Office of the CEO, elevating the role of the bus in the overall transit network, and adopting the Long Range Transportation Plan update. These steps are in addition to the ongoing planning and construction of Bus Rapid Transit, rail and highway projects funded in part by voter-approved sales tax measures.

With the multitude of projects and initiatives completed, underway, or in the planning stage, it is easy to be lulled into a false sense of progress. Progress, as embodied in Vision 2028, is about doubling the share of non-solo driving trips, increasing bus speeds by 30%, ensuring everyone is within a 10-minute walk or roll to mobility services and need not have to wait more than 15 minutes any time of the day, and having ways to bypass congestion. These are ambitious targets.

The COVID-19 pandemic and economic downturn further complicate travel patterns and behavior. In the short-term, transit ridership is suppressed and for many the work-from-home is the new commute. In the longer term, Los Angeles County's very high dependence on driving may worsen.

For all these reasons, an opportunity exists to envision a mobility system of interlocking parts that can fill unmet mobility needs, unify all the different modes of mobility, and create network operational synergies. Metro has already taken the first step with the NextGen Bus Plan, which has demonstrated the benefits of this holistic approach as applied to the bus network. A similar mindset should be considered for planning the rail network, accommodating bicycles, walking, and other personal mobility devices on the transportation network, the arterial and highway network, and convening and engaging partners on transit-supportive regional land use patterns – these efforts, when layered together, form a mobility system of interlocking parts.

Metro must partner with municipalities to shape and maximize the benefits of Metro's investments. Municipalities have the authority over the local public right-of-way, land use policies and zoning, parking supply requirements, and urban design standards. Delivering world class transportation will require strengthening and deepening partnerships with municipalities.

WHAT IS METRO DOING TO EXPAND THE TRANSPORTATION NETWORK AND INCREASE MOBILITY FOR ALL USERS? (Initiative 1.1)

We're targeting infrastructure and service investments towards those with the greatest mobility needs: High-quality transportation is essential for accessing opportunities. Vast disparities among neighborhoods and individuals in LA County reduce access to opportunity among disadvantaged communities, whether they be jobs, housing, education, health care, safe environments or other core tenets of thriving, vibrant communities. In addition, people with disabilities are disproportionately persons of color, older adults, low income, and persons with limited English proficiency. Transportation infrastructure, programs, and service investments must target those with the greatest mobility needs first, and thus improve access to opportunity for all. Equity means that Metro's service delivery, project delivery, policy decisions, and distribution of resources account for the different histories, obstacles, and needs of communities across the region. Metro is making progress with a variety of decision-making tools, including the Equity Platform, Equity Focus Communities definition, Metro Budget Equity Assessment Tool (MBEAT), Equity Tool, and Rapid Equity Assessment.

- Metro's Equity Platform Framework, adopted in 2018, lays the groundwork for how equity should be infused into the agency's business practices. Since then, Metro appointed the first Equity and Race Executive Officer, who is institutionalizing equity-supportive tools and resources. As one early deliverable, MBEAT guides Metro staff through a structured set of questions in considering racial and social equity explicitly in budgetary decisions. MBEAT has already been applied to the FY2021 mid-year budget and will be applied to the development of the FY2022 budget.
- We are also developing the Metro Equity Tool, which will assist staff in:
 - 1) identifying disparities that impact how Metro's services, programs, and projects are experienced,
 - 2) understanding the root causes of those disparities (in terms of past, present, and future effect) , and
 - 3) developing and implementing projects, programs, plans, policies, and initiatives in a manner that provides more equitable outcomes.

To identify communities where strategic transportation investments can significantly eliminate disparities and improve mobility, the Metro Board approved the classification of Equity Focus Communities (EFCs) in 2019 as part of the 2020 Long Range Transportation Plan. EFCs are places where strategic transportation investments can potentially reduce or eliminate disparities in mobility and other outcomes. EFCs are based on income, race, and car ownership. EFCs have been highlighted in other initiatives, such as the Transit-Oriented Communities Implementation Plan. By identifying communities with the greatest mobility needs, Metro can strategically plan for infrastructure and services to better address physical, social, and economic barriers to opportunity.

[Photo of Metro public meeting with audience members. The 2019 Public Participation Plan has selections. Or photo of a bus stop with riders waiting.]

Infographic: Equity Focus Communities (EFCs)

- EFCs comprise roughly 5% of the land area of LA County and contain roughly 30% of the population.
- Residents living in EFCs spend an estimated 55% of their income on housing and transportation compared to 33% countywide.
- 20% of households in EFCs are within a 10-minute walk of high-quality transit and 60% are within a 10-minute roll, compared to 8% and 38%, respectively, for LA County.
- Roughly 28% of all fatal and severe collisions and 40% of severe injury and fatal collisions involving pedestrians and bicycles in LA County occur in EFCs.
- In 2017 there were only 11 miles of protected bikeways in EFCs within ½ mile of fixed guideway transit.
- There are over 25,000 Federal, State, and County-Administered affordable housing units within 1/2 mile of high-quality transit in EFCs. This represents 23% of all the units in the county and 72% of the units within 1/2 mile of fixed guideway transit.
- Roughly one third of all air quality pollutants, countywide, are emitted in EFCs.
- Roughly one third of all identified activity centers are located in EFCs. Of these activity centers, 32% are with a 10-minute walk and 76% are within a 10-minute roll of fixed guideway transit stations.
- Of the principal arterials located in EFCs, 79% of the lane miles are in poor condition and only 2% are in good condition. This is in contrast to the county average for principal arterials, with 66% in poor condition and 6% in good condition.

Source: 2020 Long Range Transportation Plan Technical document, p. 114-p115

In addition to EFCs, Metro is gaining insights for decision-making on the mobility needs of women. The 2019 study, “Understanding How Women Travel” provides detailed analysis showing that women have different mobility needs, travel patterns, and commute demands, and perception and experiences of safety. The lessons from the study are informing the NextGen Bus Plan, Customer Experience Plan, and Better Bus initiative. In addition, Metro is developing a Gender Action Plan to ensure the agency’s activities include a gender perspective and to promote the consideration of gender issues at all levels. More details about these initiatives are highlighted in later sections of this report.

[Data visual: Suggesting an infographic: 60 percent of female riders reporting feeling safe riding Metro by day, a portion that falls sharply to 20 percent at night. Source: http://libraryarchives.metro.net/DB_Attachments/2019-0294/UnderstandingHowWomenTravel_FullReport_FINAL.pdf]

- **We're expanding the transportation system as responsibly and quickly as possible:** In 2020, the Metro Board adopted an update to the Long Range Transportation Plan, the agency's funding plan from 2017 to 2047. The plan provides a balanced and comprehensive approach to addressing the county's mobility needs with expected resources. Over the next few decades, Metro will invest more than \$80 billion to improve, expand and upgrade LA County's extensive public transit system, with over \$68 billion of it on major transit projects. This includes the construction and improvement of 22 transit corridors, and the addition of 106 miles of fixed guideway transit. In total, the Metro rail network will expand to over 200 stations covering nearly 240 miles.

While planning for the long-term expansion of the region's transit network, Metro is well on its way to delivering key projects that will add more rail, bus rapid transit, and walking and bicycling options by 2028, as summarized below.

[Photo: Metro capital construction]

[Data Visual indicating progress of:

- **New Blue (Line A):** 2018 - Planning Phase, 2 / 2021 – Completed in 2019
- **Purple Line Extension Section 1:** 2018 – Construction / 2021 – Construction, projected completion in 2023
- **Purple Line Extension Section 2:** 2018 – Final Design / 2021 - Construction, projected completion in 2026
- **Purple Line Extension Section 3:** 2018 – Bid / 2021 - Construction, projected completion in 2027
- **Regional Connector construction:** 2018 – Construction / 2021 - Construction, projected completion in 2022
- **Crenshaw/LAX:** 2018 - Construction / 2021 – Testing, projected completion in 2021
- **Gold Line Foothill Extension, Phase 2:** 2018 – Bid / 2021 - Construction, projected completion in 2027
- **Metro Rail to Rail / Rail to River:** 2018 Environmental / 2021 – Engineering, projected completion in 2024
- **Division 20 Portal:** 2018 – Final Design / 2021 – Construction, projected completion in 2024
- **Airport Connector:** 2018 – Final Design/ 2021 – Bid, projected completion in 2024
- **Orange Line Grade Separations:** 2018 – Environmental / 2021 – Design, projected completion in 2025
- **Link Union Station Project:** 2018 – Environmental / 2021 – Engineering, projected completion in 2027

Note:

*Metro also supports other capital projects through programming of sales tax measures and technical assistance.

** See the 2020 Long Range Transportation Plan Technical Document for more details.

The evolution of technology has had a profound impact on how mobility services are delivered. One of the most noteworthy 'disruptions' has been on-demand technology-enabled apps such as ridehailing and delivery services. Embracing on-demand service for the public good, Metro launched Metro Micro in December 2020, a three-year pilot program that provides on-demand ride-hailing service for short trips in areas of the County that are less suited for conventional fixed-route bus services. Metro Micro uses small vehicles, operated by Metro, in designated service zones in Los Angeles County. The service is designed to complement the existing transit system and was planned in conjunction with the NextGen Bus Plan, a redesign of the bus network. By introducing and testing a new service focused on short trips in smaller vehicles, Metro can better adapt operations to match the mode and vehicle to the diverse customer base. This new operation taps into the movement around new technology and transportation by providing ridesharing with Metro for short trips. Metro will continually refine this service based on demand and real-

time results from data collected during its operation. Six Metro Micro zones were deployed in 2020, and three more will be launched by September 2021.

[Photo: Metro Micro vehicle

Caption: Designed the fleet styling standard to make an attractive and easily identifiable new Metro Service.]

HOW IS METRO IMPROVING LA COUNTY'S OVERALL TRANSIT NETWORK AND ASSETS? [Initiative 1.2]

- **We're investing in a world class bus system:** Metro's bus network is the backbone of the public transport system and carries nearly 75% of Metro riders. The half-a-million daily trips currently taken on the bus system are predominantly from Equity Focus Communities. This underscores the importance of improving bus service to provide social and racial equity for Metro riders. In October 2020, the Metro Board adopted the NextGen Bus Plan, which redesigned the bus network to deliver faster, more reliable, and convenient service to be more relevant to today's travel patterns. The NextGen Bus Plan, implementation which began in 2020, is offering more frequent service on key corridors, particularly during off-peak hours, and improving the speed of service via transit supportive infrastructure, such as the 5th Street and 6th Street bus-only lanes in downtown LA. The network restructuring will be complete by the end of 2021.

Complementing the network redesign of the NextGen Bus Plan is the Better Bus Program, which elevates attention to other aspects of the bus experience, including bus speeds, on-time performance, bus stop facilities, better security, improved cleanliness and better real-time information. Metro bus riders are at the center of the Better Bus effort, and customer feedback is being used to drive improvements.

[Map of high frequency NextGen bus service overlaid with Metro Micro zones.]

[Data Visual: By the end of 2021,

- The number of frequent bus lines will increase from 16 to 29 on weekdays
- 83% of Metro's current riders will have buses running every 5-10 minutes, compared to 48% in 2019
- 2.2 million residents will be within ¼ mile of a frequent bus stop, compared to 900,000 in 2019
- 18.6% more Equity Focus Communities will be newly served with 10-minute all day service
- Mid-day, evening and weekend service will improve and expand, creating an all-day, 7-day-a-week service

Congestion on local streets significantly slows buses and the journey times of customers, and increases Metro's costs to maintain the same levels of service. Improving the flow of buses and general traffic is a win-win scenario for all users of the roadways.

- Metro is finding creative ways to work with city partners to speed up bus trips and move more people through congested corridors. Examples include rapid roll out of bus-only lanes in downtown Los Angeles.
- Metro will begin implementing all-door boarding, transit signal priority, and bus priority lanes in select corridors through a new \$25 million SB-1 grant.
- Metro has programmed \$500 million from 2018 - 2020 on municipal projects to deliver traffic signal upgrades, transit preferential treatment and priority systems, computerized traffic control and monitoring systems, and intelligent transportation systems.
- Metro developed a five-year, \$2.1 billion program to support the Better Bus program.

[Photo: Bus in a bus-only lane zipping by SOVs]

[Data Visual: Suggesting a bar graph: As of Dec 2020: the 13,802 bus stops served by Metro, only 24% have a transit shelter, 46% have seating and less than 1% have dedicated lighting. Just 2% have real-time information displays. And more than half of bus stop areas lack curb ramps or other important provisions for people with disabilities. Source: Metro Customer Experience Plan 2020]

Enforcement in bus-only lanes is critical for keeping buses running on time. In February 2021, California Assemblymember Richard Bloom introduced Bill AB 917 that would authorize any public transit operator to enforce parking violations in specified transit-only traffic lanes through the use of video imaging and to install automated forward facing parking control devices on public transit vehicles. Metro advocated for state-wide enabling legislation. Metro's case for automated bus lane enforcement originated from an Unsolicited Proposal to the agency in 2018 that ultimately showed the magnitude of bus lane infractions on Wilshire Boulevard and the need for regulatory intervention.

Side Bar: Unsolicited Proposals allow the private sector to present innovative ideas directly to Metro for evaluation, jump-starting the procurement process by bringing different approaches and solutions to the table, thus enabling Metro to more quickly realize the benefits of new opportunities to deliver service better, faster and more efficiently. See Goal 5, Initiative 5.4 of this report for more details.

[Photo: bus lane, bus, parked car, camera on bus taking photo of license plate]

[Side Bar: Bus speeds had decreased pre-COVID due to traffic congestion, but bus lanes can help improve speeds as traffic returns. Metro has helped to add 11 bus-only lane miles to the transportation network since 2018. For example, the Flower Street Bus Lane service greatly improved mobility, accounting for more than 80 percent of people moving in the corridor or around 10,000 bus riders a day during the peak-hour period. Person-throughput increased 37 percent compared to pre-traffic conditions with limited reduction of the capacity in general use lanes for private vehicles. Two-thirds of bus customers and two-thirds of operators reported time savings. This perceived time savings is consistent with observed travel times, which improved up to 30 percent throughout the corridor. Based on mid-pilot period person throughput data. <https://vimeo.com/377091366> (Photo also available in the CX Plan.)

- **We're partnering with Metrolink:** The Southern California Regional Rail Authority (Metrolink), partially funded by Metro, provides interregional rail services that complements the Metro bus and rail network. Its trains run on routes that parallel congested highway corridors and offer the traveling public an alternative solution to driving alone. As an increasing number of Los Angeles County residents move to adjoining counties and commute back into the county to work, the role of Metrolink to provide a safe, convenient, reliable, and environmentally-friendly alternative to driving will increase in importance. Metro is a partner in Metrolink's Southern California Optimized Rail Expansion (SCORE) program, which is a \$10 billion capital program to upgrade Metrolink's passenger rail service through 75 different projects across six counties. Improvements include grade crossing, station and signal improvements, and track additions to improve safety, provide more frequent rail services, and access to jobs and affordable housing. So far, the Southern California Regional Rail Authority has secured \$2 billion in funding to implement the program.

Southern California Optimized Rail Expansion (SCORE) Capital Plan Select Projects (Source for more information: <https://metrolinktrains.com/about/agency/score>. Accessed March 31, 2021)

- Simi Valley Double Track Project: Metrolink Ventura Line. Projected completion in 2025
- Burbank Junction Speed Improvements: Antelope Valley and Ventura County Lines. Projected completion in 2023.
- Chatsworth Station Improvements: Ventura County Line. Projected completion in 2024.
- Rancho Cucamonga Extension Project: San Bernardino Line. Project completion in 2026.

Data Visual indicating progress of the following SCORE Projects:

- Simi Valley Double Track
- Burbank Junction Speed Improvements
- Chatsworth Station Improvements
- Marengo Siding Extension Project
- El Monte Siding Extension Project
- Rancho Cucamonga Siding Extension Project
- Serra Siding Extension Project

➤ **We’re optimizing the speed, reliability, and performance of the existing system by revitalizing and upgrading Metro’s transit assets:** To deliver world class transit service that is safe, reliable, and meets customers’ expectations, Metro must maintain its physical assets – transit vehicles, facilities, infrastructure, and equipment – in a state of good repair. The passage of Measure M in 2016 will greatly expand Metro’s capital program over the coming decades. The collection of assets to manage and maintain on top of existing stock will expand with new infrastructure. Hence, Metro has procured a new Enterprise Asset Management System software, which will be fully implemented by 2024. The new software will enable Metro to track its assets and conditions more efficiently. Metro has also fully complied with federal requirements to complete a Transit Asset Management Plan (2018) and to set and report on asset performance annually.

Improving the connectivity of transportation services and first last mile access to transit — particularly walking and bicycling— can enhance the customer’s trip. The next chapter, Progress of Goal 2 focuses on improving the user experience and will delve deeper into factors increasing connectivity.

➤ **We’re improving connectivity to provide seamless journeys:** Since 2018, the Metro Board has approved plans to improve first and last mile access to 52 transit stations. Funding commitments associated with those plans from various sources total \$33 million and cover 17 of those 52 transit stations. Additional funding through the Metro Active Transport funding program will provide \$31 million to improve access to 11 additional transit stations. Funding commitments are essential to ensure that safe and accessible routes to transit are implemented.

[Sidebar: Metro continues to encourage cycling as a first last mile access to transit and provides bike hubs for secure storage.

[**Sidebar:** As of March 2021, these First Last Mile Plans have been approved and await implementation (* secured funding):

- Metro Orange Line Improvements (Sepulveda Station) First/Last Mile Plan*
- East San Fernando Valley Transit Corridor
- Purple Line Extension First/Last Mile Plan — Sections 2 & 3
- Blue Line First/Last Mile Plan*
- Inglewood First/Last Mile Plan*
- Gold Line Foothill Extension 2B*
- Aviation / 96th St Station (Airport Metro Connector) First/Last Mile Plan

- **We're working to improve safety on the transit system and reduce roadway collisions and injuries:** As a transit operator and funding partner for streets and highways, Metro plays a significant role in transportation safety. Metro's Office of Civil Rights and Inclusion Accessibility/Title VI team have worked with municipalities to install audible pedestrian signals for projects encompassing pedestrian crossings at intersections adjacent to Metro transit hubs. Metro has developed and tested textured directional paths at Metro rail crossings, and is investing the feasibility of similar applications to angled, non-rectilinear intersections adjacent to transit facilities.

Even though municipalities and Caltrans own and maintain most roadways, Metro can advance safety as a convener, planner, funder and operator. The urgency for Metro to exercise this influence mounts as motor vehicle crashes have become, in recent years, among the leading causes of early death in Los Angeles County. In 2017 alone, vehicle crashes in the county injured more than 91,000 people and killed 860 people. In January 2021, the Metro Board approved a resolution directing staff to develop a Street Safety Policy, encompassing strategies to reduce injuries and deaths, the creation of a countywide data collection program to document and analyze transportation-related serious injuries and fatalities, and an assessment of internal risk and liability for the safety of all Metro mobility services.

To promote active transportation options for nearby trips, Metro assists municipal partners with technical grant writing for their pursuit of funding for projects and programs that promote biking and walking, improve safety, enhance public health, and benefit disadvantaged communities through the State's Active Transportation Program (ATP). Since the adoption of Vision 2028, this assistance has supported municipal partners through two cycles of the ATP and resulted in grant awards totalling \$145.5 million. In addition to grant writing assistance, Metro partners with Caltrans to provide other technical assistance to help municipal agencies deliver local projects funded by state and federal grants. Since April 2019, Metro and

Caltrans have hosted 22 trainings across the county and via webinar which have been attended by staff from 57 agencies.

[Infographic: Half of all trips in LA County are three miles or less, which is generally a distance that can be biked. Approximately one quarter of trips are under one mile, which is generally a distance that can be walked. Over a third of trips of one mile or less are currently driven. Source: 2016 Metro Active Transportation Strategic Plan.]

- The onset of the pandemic spurred Metro to employ the range of existing technology, equipment, and infrastructure to protect the health and safety of both frontline staff and customers. Rear door boarding was introduced to encourage physical distancing between bus operators and customers. By May 2020, wearing masks became mandatory for all on all transit vehicles. Where observed compliance was an issue, Metro deployed street teams to hand out masks on specific bus routes or at bus stops. To help riders plan their essential travel, Metro worked with *Transit App*, Metro’s official app, to introduce a new crowding feature that predicts occupancy levels on buses.

[PDF image: Transit app car card ad promoting the crowding feature.]

[Photo: Rear door boarding of riders who are also wearing masks.]

WHAT IS METRO DOING TO MANAGE TRANSPORTATION DEMAND IN A FAIR AND EQUITABLE MANNER?

[Initiative 1.3]

- **We’re implementing the ExpressLanes Tier 1 network:** The Metro ExpressLanes Program offers drivers the option to bypass heavy traffic by paying to access a toll lane. This program currently operates on the I-110 and I-10 freeways and with plans to expand the ExpressLanes network in the region. Metro is committed to delivering the following Tier 1 ExpressLanes network within the 2017-2027 timeframe by converting existing high-occupancy vehicle (HOV), or carpool, lanes into toll lanes:

ExpressLane Segment	Status
I-10 (between I-605 and the San Bernardino County line)	Environmental phase
I-105 (between I-405 and I-605)	Environmental phase completed; design phase beginning summer 2021, revised opening 2027
I-110 (from 182nd Street to I-405)	No current action; opening 2044 per Measure M
I-405 (between I-101 and I-10)	Environmental phase
I-405 (between US 101 and the Orange County line)	Budgeted start date to be determined
I-605 (between I-10 and the Orange County line)	I-10 to I-105: environmental phase I-105 to Orange County Line: budgeted start date to be determined

- **We’re planning to test pricing strategies to reduce traffic congestion:** Congestion in LA County is prevalent throughout the day and occurs on arterial streets as well as on regional highways. While the COVID-19 pandemic has reduced traffic congestion in the interim, traffic is likely to return as economic activity rebounds. In fact, during the summer of 2020, the overall travel on the regional freeway system returned to 90% of what it was before the pandemic in January 2020. Metro will test more expansive congestion pricing models, beyond the ExpressLanes Program, for managing traffic in the most congested areas of the County. In 2019, Metro initiated the Traffic Reduction Study to examine the feasibility of a traffic reduction pilot

program. This study will explore how to reduce traffic through a two-pronged approach: 1) manage travel demand through congestion pricing, and 2) provide more high-quality transportation options. A pilot program concept and implementation plan will be brought to the Metro Board for consideration in Spring 2022. Should the Board approve the proposal, Metro will work with partners and the public to begin the multi-year pilot design for an anticipated launch in 2025.

- **We're addressing the movement and conflicts between goods and people on streets and highways:** LA County is home to the nation's largest port complex, the Ports of Los Angeles and Long Beach. Truck-based goods movement directly impacts the performance of the region's highways, and vice-versa, highway congestion delays the delivery of goods to destinations within the county and throughout the country. The I-710, SR-60, and I-10 are the most impacted highways. Metro is undertaking various projects, including spot congestion improvements, truck platooning trials, to improve conditions. The impacts associated with truck traffic are not limited to highways. The arterial road network is used by trucks, buses, trains, cars, pedestrians, cyclists, and so on. The mix of users and travel patterns creates conflicts.

In January 2021, the Metro Board adopted the 2021 Los Angeles County Goods Movement Strategic Plan – Metro's response to the many goods movement-related challenges affecting the environment and well-being of communities. Metro convened a network of community, private, and public sectors to collaborate on a plan that is centered on achieving inclusive growth that supports the county's economic competitiveness, environmental sustainability, and social equity goals.

[Photo: Big rig truck or delivery vehicle driving on the street among other vehicles, with pedestrians and cyclists traveling in the midst.

- **We're exploring opportunities for expanding access to shared, demand-responsive transportation options for everyone:** A precursor to Metro Micro, the Mobility on Demand (MOD) pilot program demonstrated how ride-hailing technology can effectively connect riders to public transit. MOD was launched with private ridesharing company Via in 2019 and funded in part by a Federal Transit Administration Mobility on Demand grant. It was designed to offer a flexible, new option for first- and last-mile trips to and from transit. Wheelchair accessible vehicles were available, and rides could be booked through a call center, in addition to a smart phone. In its two years of operation, this pilot project provided more than 270,000 rides and met or exceeded project goals, including average wait times, ridership and average ride ratings, at 4.9 stars out of 5. During the COVID-19 pandemic, Metro suspended shared rides, introduced point-to-point rides to any destination within the zones, including grocery stores and hospitals. In partnership with community organization First 5 LA, the program also delivered food and diapers to families in need, to support vulnerable communities during the pandemic.

WHAT CHALLENGES AND OPPORTUNITIES SHOULD METRO CONSIDER?

- A. **Plan and deliver mobility as a system of interlocking parts:** The Long Range Transportation Plan sets out a comprehensive and balanced approach for considering the mobility needs of everyone in Los Angeles County with expected resources. The plan expresses all the commitments made over the years through voter-approved sales tax measures and other Metro Board decisions. The plan also identifies the role of bold policies (e.g. road pricing) and close partnerships to incentivize more efficient use of the transportation system. Building on this baseline, an opportunity exists to envision a mobility system that can fill unmet mobility needs, unify all the different modes of mobility, and create network operational synergies. Metro has already taken the first step with the NextGen Bus Plan.

The NextGen Bus Plan has demonstrated the benefits of a network approach to transit planning using data on current travel patterns – resources can be more efficiently allocated for maximum effectiveness, and vastly improve the customer experience. A similar mindset could be considered for envisioning and planning the rail network, micromobility and shared mobility, the arterial and highway network, and regional land use patterns in an integrated manner – when layered together, they form a mobility system of interlocking parts.

- For rail transit, Metro has traditionally planned and delivered projects as discrete stand-alone segments. As such, the interoperability of the lines and integration of segments with the rest of the transit network – service levels, physical integration, and equipment – is sometimes overlooked. Even though numerous rail lines are in operation today and many more are under construction, there is still significant value, both in terms of financial impacts and customer experience, in taking a more holistic approach to rail network planning moving forward. What is the vision for Metro Rail and intercity regional rail? How should the rail network reinforce and support focused regional land use patterns? How will the bus network restructuring through the NextGen Bus Plan be integrated with existing and future rail lines?
 - For micromobility and shared mobility, what is the vision for integrating on-demand shared services, such as e-scooters, bike share, and ridehail with the Metro Bus and Rail networks? Prior to COVID-19, Metro initiated the New Mobility Regional Roadmap – a countywide coalition of local governments to address this very topic. This coalition should be re-activated as soon as possible.
 - For arterials and highways, what is the vision for prioritizing different users, the pricing signals that should be introduced to manage congestion, and how safety and equity can be embedded in design and operations? How can low cost and very cost-effective bus speed and reliability improvements, such as bus lanes, bus bulbs, and signal priority be accelerated? Similarly, on freeway corridors, how can Metro accelerate low-cost “hot spot” improvements that improve vehicle flow and safety, but do not physically expand roadways or take property? The challenge, of course, is that Metro does not own or operate the road network (see Goal 4 for current efforts to incrementally modernize Metro’s highway funding programs). Metro can provide a countywide complete streets vision and plan to help partners transform key arterials. In addition, the federal administration’s proposed American Jobs Plan provides indications that the traditional pursuit of highway capacity expansion will give some way to maintenance and rehabilitation, and even potentially re-imagining the role of highways to reconnect and repair communities. Metro, in collaboration with municipal partners, community-based organizations, and Caltrans, can seize this emergent and once-in-a-generation moment to re-imagine the purpose and future of the mobility system in Los Angeles County.
- B. Deepen Partnerships with Municipalities to Deliver World Class Transportation:** Maximizing the mobility benefits of Metro’s investments to as many people as possible, especially those with the greatest mobility needs, will require deeper partnerships with municipalities. Being responsive to the diverse needs in the county would not be possible without these essential partnerships. Metro will increase collaboration with local jurisdictions to support transit priority on local roadways, to improve first and last mile access to transit, to improve local mobility and to realize transit-oriented communities. Municipalities have direct control over supportive policies over land use and affordable housing, parking supply requirements, transit priority measures, and complete streets. In addition, municipalities have a lot of influence over the implementation of Metro’s bus and rail design guidelines and standards for a world class transit customer experience. Building on Metro’s Transit-Oriented Communities (see Goal 3) and first and last mile programs, Metro could explore supportive policies agreements, joint grant writing, and incentive structures as a way to

lock in mutually beneficial commitments by Metro and host jurisdictions when planning a transit corridor, bus stop improvements, or other type of facility.

C. Address the State of Good Repair Backlog: As noted earlier, Metro is tracking its assets and conditions on a regular basis. The state of good repair backlog is \$2.7 billion as of June 30, 2020, in the following distribution:

- Infrastructure (e.g. rail guideways): 40%
- Buses and trains: 38%
- Passenger facilities, parking facilities, administrative buildings: 20%
- Equipment: 2%

By 2030, the cumulative state of good repair needs will reach \$6.3 billion. In comparison, the cumulative funding for state of good repair identified in the Long Range Transportation Plan is \$3.2 billion. In recent years, the gap between the average annual state of good repair needs and funding in the annual budget has widened (e.g. the approved FY2021 budget identified \$414 million for state of good repair, leaving a shortfall of \$216 million)

Looking ahead, the state of good repair needs will continue to rise as assets age and new assets are added to Metro's inventory. The expected state of good repair needs is \$11.8 billion in 2040, \$20.4 billion in 2050, and \$26.7 billion in 2060. Narrowing the state of good repair gap will require making trade-offs with other investment demands.

D. Develop a Comprehensive Pricing Framework: In 2020, Metro initiated the Comprehensive Pricing Study with the intention of preparing an overall pricing framework to unify the pricing policies for Metro Bus and Rail, Metro Micro, Metro Bikeshare, Metro Vanpool, Metro parking facilities, micromobility parking at Metro Rail stations, and ExpressLanes. This work is on hold pending the initiation of the Fareless System Initiative pilot program (see Goal 2). The lessons and directions from implementing the Fareless System Initiative pilot will inform the appropriate next steps for the Comprehensive Pricing Study.

Progress on Goal 2

Deliver outstanding trip experiences for all users of the transportation system.

Metro will endeavor to improve trip experiences for all users of the transportation system, recognizing that a world-class system, serving a world-class metropolis, should be attractive, affordable, efficient, safe, convenient, and user-friendly. Specifically, Metro will take actions to improve security, ease of use, and access to accurate travel information on the region's transit systems, and will work to improve customer satisfaction at all customer touch points, as described in the following pages.

Progress at a Glance:

A world class transportation system begins and ends with each customer who travels to work, home, school, and other destinations. Metro's goal is to put the needs of the customer first by making its mobility services attractive, affordable, efficient, safe, convenient, and easy to use. Significant efforts include establishing the Customer Experience team in the Office of the CEO, adopting the agency's first Customer Experience Plan, increasing the frequency of bus routes, introducing flexible ways to access transit information and to pay fares, and bringing free Wi-Fi Internet to the bus fleet now, and to rail in the future.

Safety and security of the transit experience is of paramount concern for Metro and the broader community. Metro convened the Public Safety Advisory Committee (PSAC) to help re-imagine Metro's approach to public safety on the transit system. PSAC will help guide new initiatives, including the deployment of unarmed transit ambassadors and flexible dispatch of social workers instead of relying solely on law enforcement.

The Integrated Station Design Standards Working Group has undertaken highly coordinated, cross-departmental, and comprehensive efforts to update station design standards and test new customer amenities for station public areas. The goal of these efforts is to create state-of-the-art customer environments that are safe, accessible, well-maintained and sustainable, and that reflect global transit station design best practices.

The care and commitment to the diverse needs of customers and their experiences form the new baseline standard at Metro. Fully implementing the Customer Experience Plan, enhancing bus frequencies, making transit fareless, implementing the future recommendations of the Public Safety Advisory Committee, and narrowing the state of good repair backlog will require Metro to make difficult choices to identify new sources of sustainable funding for operations and potentially reallocating existing fund sources towards these priority needs.

Infographic: Metro Transit Customer Profile		
	Bus Customer	Rail Customer
Gender, Race, Ethnicity	53% Women 66% Latinx 15% African-American	46% Women 44% Latinx 18% African-American

WHAT IS METRO DOING TO IMPROVE SECURITY? [Initiative 2.1]

- **We're modernizing our approach to public safety:** Providing a transit system that is safe for both customers and frontline staff is a continuous endeavor for Metro. Evolving the role of system security and law enforcement will require a commitment to building and strengthening relationships with customers, advocates, and all levels of government. Recent efforts include:
 - Metro is convening a Public Safety Advisory Committee to work with the agency's System Security and Law Enforcement, Office of Civil Rights, Office for Equity and Race, and the Executive Officer for Customer Experience to develop a community-based approach to public safety on the transit system.
 - In March 2021, the Board approved a motion directing at least \$40 million be included in the FY2022 budget to support public safety and homelessness initiatives (e.g. a transit ambassador program (\$20 million), elevator attendants at rail stations (\$1 million), flexible dispatch system enabling response by non-law enforcement personnel (\$1 million), pilot homelessness strategies to be recommended by the Public Safety Advisory Committee (\$3 million), etc.)
 - Metro is incorporating safety and security in developing and refining station public area design standards through the coordinated efforts of the Integrated Station Design Solutions Working Group. These efforts include design criteria refinements that help ensuring station public areas are free of clutter, provide clear site lines, have updated customer communication interface, and safe paths-of-travel.
 - Metro is updating its camera intelligence system. In 2020, Metro received a \$5 million federal grant to procure a new video management system for its rail stations. Metro will continue to request grant funding to enhance closed circuit television technology systemwide to protect customers.
 - Metro championed the advancement of cybersecurity initiatives to protect the agency's digital infrastructure by obtaining a \$3 million grant in FY20.
 - Metro has updated its sexual harassment protocol: victims or witnesses can call 888-950-7233, text 213-788-2777, or report incidents through the Transit Watch app. Security dispatch will notify law enforcement, who will respond to sexual harassment incidents as a high priority. Victims will receive a referral to Metro's "It's Off Limits" sexual harassment support hotline to receive counselling, 24 hours a day, seven days per week, with both English and Spanish language options.
 - Metro introduced implicit bias training to all Metro Transit Security officers in 2020. The goal of implicit bias training is to learn about one's default assumptions about other people, such as race, and to learn how to eliminate potentially discriminatory behavior. Disabilities sensitivity and awareness training, including sighted guide training and hands-on travel by wheelchair experiences is also a requirement for new security officers
 - Metro's Emergency Security Operations Center will be ready for occupancy in 2024. The Center will improve Metro's physical security presence, bus and rail incident response and coordination with law enforcement and fire response partners, operational monitoring systems, communication network infrastructure, and emergency management functions. The Center will aid in the safe and secure movement of customers in time for major public events, such as the 2028 Summer Olympic and Paralympic Games.
 - In 2020, Metro enhanced the Transit Watch mobile app with Spanish language and the option for customers to anonymously submit incident events to Metro security dispatch via text and photo upload, and to receive push notifications about critical alerts.
 - Metro Transit Security established a training unit to ensure security officers are trained appropriately to protect customers, employees, and infrastructure. Metro Transit Security will be procuring body-worn cameras for its security officers to document incidents, ensure transparency, and act as a deterrent.

[Photo: C3 Team members speaking with and/or helping a person experiencing homelessness.]

[Data Visual or integrate this into the text: The most frequently-occurring crimes are seeing decreasing rates: Larceny (2018 - 829 cases; 2020 - 383 cases) and battery (2018 - 726 cases; 2020 - 651 cases). Less common crimes have seen incremental increases, including vandalism, trespassing, arson, homicide, and aggravated assault, including assault and battery of Operators. Source: Metro Safety, Security and Law Enforcement Dept, February 2021]

HOW IS METRO IMPROVING LEGIBILITY, EASE OF USE, AND TRIP INFORMATION ON THE TRANSIT SYSTEM? [Initiative 2.2]

- **Metro is improving design consistency across its Metro rail stations and transit centers, where customers may also transfer to other transit systems and modes to complete their journeys.** An easy-to-recognize, integrated systemwide design approach for all new Metro stations reflects a focus on the customer experience. Natural light illumination, wayfinding standards, kit-of-parts construction and materials provide important elements of continuity for customers. Integrated public art and sustainable landscaping, developed in consultation with surrounding communities, provide elements of variability and visual interest. Together, these elements provide a strong and positive customer experience, celebrate context-sensitive placemaking in communities, and ensure cost-effective decision-making. Metro's Systemwide Station Design Standards and Transfers Design Guide are applied daily to every capital transit station and corridor project in Metro's Measure R and M portfolios, Metro joint development and first/last mile projects, and all updates to Metro's existing stations, as well as the Better Bus Program.

[Photo with notations of design highlights: Extract from Factsheet at <https://media.metro.net/2020/Systemwide-Design-Fact-Sheet.pdf>]

- **We're improving the experience when waiting for the bus.** Metro's Better Bus Program has launched a series of pilot programs in 2021 to test improvements, such as e-paper passenger information, lighting, high contrast surface applied tactile elements, and other customer amenities at select bus stops. Better Bus also looks beyond these pilots at long-term, enterprise-wide improvements that will require systems change and ongoing funding sources. For example, only about a quarter of bus stops served by Metro have shelter, and providing shade at the remaining bus stops will require larger investment and new partnership models with cities. In addition, the Metro Transfer Design Guide provides local jurisdictions with tools to help improve the bus waiting area. These changes will not happen overnight, but Metro is formalizing and coordinating these efforts for the benefit of customers.

[Photo: Across Metro's service area, of the 13,802 bus stops served by Metro, only 59 bus stops have dedicated, pedestrian lighting. Lighting improvements is a CX Plan priority. (include photo of bus stop with solar lighting and push-button lighting, used on page 39 in the CX Plan at metro.net/cxplan)]

[Photo of an Outfront/Decaux bus stop.]

[Sidebar. Title: Bus Shelters Two hours to install. Months to plan and approve.]

The process of planning, approving, and installing bus shelters is complex. Each of the 88 cities in LA County has its unique administrative process.

Take the City of Los Angeles for example. The Bureau of Street Services (BSS) manages its bus shelter program with Outfront/Decaux, the firm chosen by L.A. to manage, install, maintain and sell outdoor advertising on bus shelters, the revenues of which pay for the shelters.

To determine that the location is technically/physically suitable for a shelter, Outfront/Decaux:

1. Uses Metro's ridership data and traffic data from L.A. and the Bureau of Street Services to ensure that bus shelters are placed citywide in all 15 City Council Districts, with geographic equity in mind.
2. Surveys the site to check for ADA compliance, nearby utilities, manholes, trees, driveways, store front and/or other sidewalk elements.
3. Works with local community groups such as Neighborhood Councils, the homeowners' association, the businesses in the vicinity of the proposed bus stop, the chamber of commerce, etc., to build consensus and support.

Once deemed suitable, then:

1. The local City Council office needs to pre-approve each site.
2. Next, eight city departments need to sign off on a permit.
3. Occasionally, a public hearing is required.

Once approved, the actual bus shelter installation takes roughly two hours. In LA City, the entire process could take anywhere between 6 months and years. The process varies for each city.

Photo of new vinyl seating. Caption: Metro Arts and Design designed unique new Sunrise/Sunset bus seat covers to create an attractive environment and are easier to clean. Vinyl Sunrise/Sunset seat covers have been installed on 65% of all rail vehicles. Metro currently has 181 new buses with the vinyl seats, with 246 more buses ordered. Installation on the bus fleet began in Spring 2021.

Photo of onboard art poster. Caption: Local artists were commissioned to uplift the customer experience through onboard art posters and digital displays. These artworks enrich the customer experience, advance cultural equity, and respond to Los Angeles County's vast and evolving cultural landscape.

- **We're making it easier to access information:** Metro is exploring ways to make information more accessible to customers when, how, and where they need it. For example, Metro partnered with Transit app in 2020 to give more trip-planning and fare payment choices to customers. The Transit App, Metro's official smartphone app, offers customers real-time arrival information, options to get around (i.e. regional transit systems, bike share, scooters, ridehail), real-time tracking of vehicles, trip planner, real-time crowding information, and service alerts.

[Photo: Transit app interface on a smartphone. Caption: In May 2020, Metro publicly announced Transit app as its official app and has seen 96,743 downloads as of Feb 2021. Averaging 53,739 active users weekly.

Source: Transit app, February 2021]

We're bringing fare payment to the smartphone: The TAP program brought an innovative "first" for fare payment in Los Angeles with the September 2020 launch of the TAP mobile app. This new technology gives customers a safe and contactless way to pay for transit. The TAP app can be used to buy fare for LA Metro and 25 additional TAP transit systems, manage TAP accounts including Reduced Fare and LIFE discounts, and plan trips using Trip Tools.

[Photo and caption: INCLUDE A PHOTO A LINE TOUCH SCREENS Metro has also introduced interactive information touch screens into the Metro Rail system, providing general and customizable arrival and trip-planning details. These units will showcase rider information, agency messaging, and paid advertisements which generate revenue for the agency. 100 screens have been installed along the Metro A Line – with E Line, C/LAX, and Regional Connector planned. Riders will benefit from digital screens installed at every Metro rail station by 2028.

- **We're improving the transit experience for customers with all levels of abilities.** Metro continues to improve accessibility for riders. Metro's design criteria now exceed minimum ADA and California Title 24 Accessibility Codes, where possible, to provide true usability. Walking surface tactile guidance wayfinding systems have been adopted into Metro Rail and Bus Rapid Transit design guidelines, which will be applied in all projects under construction, currently in design phase, and all future projects.

In October 2019, Metro piloted a new audio wayfinding technology in Union Station. The tool involves using a smartphone with an app and coded symbols installed adjacent to standard signs. Sweeping the phone scanner within the environment triggers the phone to read the sign out loud.

In Summer 2019, Metro also introduced TAP Wearables. These fare payment wearables include flexible wristbands and key fobs that are available for full fare and reduced fare riders in different sizes, great for both children and adults. TAP wearables function just like TAP cards while allowing customers with physical limitations more independence and ease when riding public transit.

[Side Bar: [TAP third-party vendor network expands to make TAP cards accessible in neighborhoods throughout LA County. In February 2021, TAP increased its third-party vendor network to 997 vendors, which include small and family owned businesses and large retail locations (7-Eleven, Walgreens, CVS, Ralphs). TAP vendors offer cash loading features and TAP account benefits to the unbanked through PayNearMe. TAP also offers cash loading features at TAP vending machines and bus fareboxes. Source: TAP, February 2021]

[Photo: Customer making a transaction at a TAP vendor location.

- **We're exploring the future of fare payment:** Looking ahead to advancing equity, Metro launched the Fareless System Initiative in 2020 to identify a pathway to implementing fareless transit on Metro Bus and Rail. Eliminating fares would lift a financial and logistical burden off of the majority of Metro customers. In May 2021, the Metro Board will consider approval of a pilot program. The pilot program will be phased, eliminating fares on Metro Bus and Rail for K-12 students starting August 2021, followed by low-income riders starting January 2022. The pilot will be an opportunity to learn about the operational impacts on bus, rail, Access Services (paratransit), system security and law enforcement, customer satisfaction, and the future of TAP and associated fare equipment.

As the payment industry evolves, Metro needs to build in flexibility and adaptability. This underscores the importance of releasing open APIs for payment so that Metro payment is available through a range of apps

and devices, and working with American Public Transportation Association and other industry stakeholders to adopt open and accessible technology standards. Metro transit information and payment should be ubiquitous and readily available.

- **We're providing free Wi-Fi Internet on the bus:** Metro introduced Wi-Fi capability on the entire bus fleet. With nearly 6 out of 10 bus customers having smartphones, Wi-Fi internet can help bridge the digital divide and improve the overall transit experience. Metro is exploring the possibility of expanding Wi-Fi to the rail stations, too.

[Photo: Image of the bus interior decal: Metro Wi-Fi Available.]

HOW IS METRO IMPROVING CUSTOMER SATISFACTION AT ALL CUSTOMER TOUCH POINTS? [Initiative 2.3]

- **We're putting the needs of our customers first:** Metro established its first ever Customer Experience Office and Customer Experience Plan (CX Plan), approved by the Board in 2020. The CX Plan looks at ways to improve the transit journey, with a special focus on the bus experience in all its component parts, such as providing accurate real-time information about bus arrivals and delays—and improved speed, ease of use, and safety and comfort (regional homelessness is a paramount issue for Metro – please see Goal 3). Progress is also being made to monitor customer experience performance measures and bolster a customer-experience mindset and culture at all levels of the organization, from front-line staff to Metro leaders.
- **We're keeping track of our Customer Experience Performance:** Annually, Metro carries out and publishes its on-board bus and rail rider survey. To augment these efforts, Metro is developing a more comprehensive Customer Experience survey and additional assessment methods to inform operations and agency improvements.

WHAT CHALLENGES AND OPPORTUNITIES SHOULD METRO CONSIDER?

A. Identify Sustainable Funding for Customer Experience, Transit Operations, Safety, and State of Good

Repair: Achieving sustainable funding for transit operations is critical. Full implementation of the recommendations in the Customer Experience Plan could range up to \$300 million per year. The pending start-up of the fareless transit pilot program will cost Metro up to an additional \$300 million annually to cover foregone fare revenue, increased transit service to match a potential surge in demand, and other increases in other operating expenses. Increasing transit service hours to achieve the full potential of the NextGen Bus Plan⁵, and tightening coordination of service with municipal transit operators to expand and improve journeys are additional improvements buoyed by widespread community support. New rail lines that will come online over the next number of decades will also incur significant operational expenses. Implementing the future recommendations of the Public Safety Advisory Committee will also require appropriate levels of resourcing. And, as noted in Goal 1, the state of good repair backlog is already close to \$3 billion. The pandemic has shown how Metro's current portfolio of funding sources, which relies primarily on sales tax revenues, is sensitive and vulnerable to major economic downturns. Metro should consider seeking new sustainable funding sources for transit operations as well as redoubling efforts to direct existing funding sources toward priority needs.

⁵ The Future Funding Scenario in the NextGen Bus Plan comprises 9.4 million revenue service hours (compared to the plan's baseline of 7 million revenue service hours).

- B. **Develop a Community-Based Approach to System Security and Law Enforcement:** The Public Safety Advisory Committee and the Metro Board will re-imagine Metro's approach to public safety on the transit system. The committee comprises 15 voting members from the community and 3 non-voting Metro employee members. The committee will also be consulted in the program design and implementation of the initiatives identified in a March 2021 Board resolution which directs at least \$40 million in the FY2022 budget for public safety and homelessness (e.g. transit ambassadors, elevator attendants, short-term shelter for homeless riders, etc.)

Current system security and law enforcement tactics may have a place in particular circumstances. However, for many other scenarios, a more holistic framework should be explored and operationalized, such as the deployment of unarmed ambassadors and flexible dispatch of non-law enforcement personnel with training in mental health and other backgrounds. The challenge, and opportunity, is for Metro to create a system security and law enforcement framework that embraces compassion and reflects the history, lived experiences, and expectations of Metro's customers and the broader community.

Progress on Goal 3

Enhance communities and lives through mobility and access to opportunity.

Transportation plays an integral role in supporting vibrant, prosperous communities and in enabling individuals and families to access jobs, essential services, education, and other social, cultural, and recreational opportunities. Through active collaboration with public and private sector partners, Metro will continue to work to make LA County's transportation system more accessible, inclusive, and responsive to the needs of the diverse communities it serves.

Progress at a Glance:

Metro understands that transportation is much more than buses, trains, and roads. Transportation is a means to strengthening communities and connecting them to each other. From developing pathways for local careers in transportation to fostering equitable development on transit corridors, Metro sees transportation as a means of uplifting communities and confronting the regional crises of housing affordability and homelessness.

Pathbreaking initiatives like WIN-LA, SEED School, Transit-Oriented Communities Implementation Plan, Joint Development policy, and the homelessness outreach teams are making a difference at the community and site-specific levels.

Looking at the bigger picture of Los Angeles County and its surrounding neighbors, greater attention must be paid to where people and jobs are strategically located in relation to the region's transportation system. Peer west coast regions like Vancouver, Seattle, and Portland have shown how the principle of aligning regional land use patterns and transportation planning can help set the foundation for robust transit ridership growth and decreased dependence on solo driving. Metro's multi-billion capital program is a transformational opportunity to strengthen the regional land use and transportation connection. However, if where people and workers are located remain spread out, unfocused, and disconnected from transportation infrastructure and services, then it is unlikely the world class transportation outcomes can be achieved. Transportation can shape land use, and land use can unlock the performance of the transportation system to improve access and opportunity to housing, employment, and other important destinations.

Metro can position itself to apply its holistic view of transportation to start the dialogue about the 'next generation' integration of regional land use and transportation planning in partnership with local, regional, and state partners. Activating world class transportation requires world class land use planning.

HOW IS METRO LIFTING UP LOCAL COMMUNITIES, AND CREATING JOBS AND CAREER PATHWAYS IN TRANSPORTATION? [Initiative 3.1]

- **We’re training workers for today’s transportation jobs:** According to the California Department of Finance, Los Angeles County is forecasted to see an absolute decline in the number of working-age adults through at least the next four decades. To address the impending labor shortage, Metro launched the Workforce Initiative Now (WIN-LA) program in 2017 to create pathways for working-age adults to go into construction, operations/maintenance, administration, and professional services jobs within the transportation industry from population groups that have faced historical barriers. Metro has developed requirements on locally funded procurements with contract values greater than \$5 million for contractors to hire WIN-LA program participants.

GOALS AND MEASURE OF EFFECTIVENESS

• MOEs from program inception through end of quarter

Source: WIN-LA Quarterly Report. 2020 Q1 (Los Angeles: Metro, 2019), 3. Source: WIN-LA Quarterly Report. 2020 Q1 (Los Angeles: Metro, 2019), 3. http://media.metro.net/2020/WIN_LA_2020_Q1_fact_sheet.pdf

- **We’re actively creating the opportunities for hiring locally:** Metro continues to implement the Construction Careers Policy, which encourages construction employment and training opportunities on locally-funded projects to those who reside in economically disadvantaged areas in the County, and the Project Labor Agreement, which sets national targeted hiring goals for federally funded projects with federal approval. Also, since 2011, Metro has advocated for reforms to federal local hire rules so that Metro can set requirements for bidders of federally-funded transit and highway projects to hire qualified local workers and businesses. Given that a high proportion of Metro’s budget for operations and capital projects come from Los Angeles County residents’ tax dollars, it makes sense for Metro to prioritize local employment. Metro is

actively engaging the Biden-Harris administration and Congress to reinstate the local hire program. Metro’s advocacy efforts had paid off in 2015 when the federal government launched the Local Hire Pilot Program, which concluded in 2017.

- **We’re setting the foundation for the next generation of transportation leaders:** Metro and LA County partnered in 2018 to create the SEED School of Los Angeles County which aims to prepare youth for college in transportation-related studies. Ground-breaking for the public boarding school took place in October 2020 on a Metro-owned site at the corner of Vermont and Manchester Avenues. The school is anticipated to open in August 2022. Development of the curriculum is underway.

HOW WILL METRO LEVERAGE ITS TRANSIT INVESTMENTS TO CATALYZE TRANSIT-ORIENTED COMMUNITIES AND HELP STABILIZE NEIGHBORHOODS WHERE THESE INVESTMENTS ARE MADE? [Initiative 3.2]

- **We’re leveraging our properties to support new affordable housing within walking distance to high quality transit:** Metro understands that every transit passenger facility is an opportunity to embrace compact, mixed-use, and inclusive development, such as affordable housing. In 2015, Metro adopted the Joint Development Policy, one of the most progressive affordable housing policies of any transit agency in North America. To date nearly 2,200 units of housing have been built on Metro property, more than 1/3 of which are affordable to households earning less than 60% of the area median income. The number of new housing units will more than double in the next few years with projects currently in negotiations, including more than 1,000 additional affordable units. There are currently 14 active joint development sites in various stages of planning and entitlement. Metro’s joint development portfolio is anticipated to grow by more than 40 new sites as a result of property acquisition for new transit lines. These new sites could represent as many as 10,000 new housing units. Given the severe housing crisis in the County, the Board and community advocates have expressed a paramount need for Metro to use its resources and authority. Metro will bring forward an updated Joint Development Policy to the Board for consideration in June 2021 that will strengthen and streamline Metro’s role in facilitating affordable housing production.
- **We’re helping communities build capacity and find the right opportunities for transit-oriented development:** Metro adopted the Transit-Oriented Communities (TOC) Policy in 2018 and TOC Implementation Plan in 2020, which authorized the preparation of TOC Corridor Baseline Assessments for all Metro transit corridors,

starting with Measure M transit corridors. Prepared in partnership with municipalities and with deep stakeholder engagement, these assessments will highlight opportunities for communities to leverage transit infrastructure and to identify potential corridor-wide and neighborhood vulnerabilities and risks. Metro will also support municipalities to build staff capacity and secure additional funding through the TOC Grant Writing and Technical Assistance programs.

[Sidebar: Since 2011, Metro has funded 32 municipalities through the TOD Planning Grant Program to prepare and adopt 43 transit supportive plans affecting 95 Metro Rail and Metrolink station areas in Los Angeles County.]

HOW IS METRO COMMITTED TO GENUINE PUBLIC AND COMMUNITY ENGAGEMENT TO ACHIEVE BETTER MOBILITY OUTCOMES FOR THE PEOPLE OF LA COUNTY? [Initiative 3.3]

- **We're strengthening our efforts to be trusted community partners.** Metro's collaborations with organizations serving communities help improve the quality and reach of public engagement. Community-Based Organizations (CBOs) are a vital part of the economy, social service networks, and communities that Metro serves. Furthermore, they are key players in civic life, public policy, and public program provision. Metro has prepared the *CBO Partnering Strategy: Elements for Successful Partnering in Professional Services* to help advance equity by leveraging the expertise and value that CBOs bring to Metro projects and, most critically, to local communities. The strategy outlines ways for Metro to equitably and consistently engage CBOs for professional services, and ways to support CBO capacity building so that they can work with Metro.

Further, Metro endeavors to provide convenience and accessibility in public processes so that that diverse voices can contribute to decision-making about current and future services. When in-person meetings were no longer viable options during Stay-at-Home orders and social distancing requirements, Metro quickly transitioned to online meetings, with telephone call-in options for those with limited internet access. Metro is also increasingly using random sample surveys to ensure that we reach a representative and inclusive sample of community members and not just those with time and resources to participate in public processes.

HOW WILL METRO PLAY A STRONG LEADERSHIP ROLE IN EFFORTS TO ADDRESS HOMELESSNESS IN LA COUNTY? [Initiative 3.4]

- **We're at the frontlines of regional homelessness:** Homelessness is a pervasive issue throughout Los Angeles County. Every day, numerous persons experiencing homelessness seek shelter in the Metro system. Metro recognizes that homelessness is not a crime and that the predicament of each person is unique. And, because customers tell us that behaviors and conditions related to untreated mental illness, addictions, and homelessness negatively-impact their use of transit, Metro has stepped up its role in bringing assistance and resources to these vulnerable individuals. In 2017, Metro began a partnership with the LA County Department of Health Services and People Assisting the Homeless to deploy County-City-Community (C3) teams to engage and connect individuals experiencing homeless on the Metro system with appropriate services. The C3 teams is comprised of nurses, substance abuse counselors, mental health clinicians, former homeless individuals, and other outreach workers. To date, the C3 teams have provided homeless outreach to over 8,000 persons, of whom 2,700 have been connected to permanent housing solutions, and now the C3 program is being expanded through funding from the Customer Experience Plan.

[Photo: C3 ambassador working with the unhoused at a bus or rail stop.]

In April 2020, Metro launched Operation Shelter the Unsheltered, a collaborative effort between Metro Transit Security (Metro-contracted law enforcement partner), the LA County Department of Health Services, The Dream Center, and LA DOOR outreach teams to address heightened numbers of homeless persons at six Metro Rail stations. As of April 28, 2021, Metro and its partners have connected 783 individuals to housing accommodations. In February 2021, the Metro Board extended the contract of the C3 homeless outreach teams to 2023 and approved funding for a four-month emergency shelter pilot program. And the Customer Experience program will be extending funding into FY22.

[Infographics suggested: According to the January 2020 Greater Los Angeles Point-in-Time Count: LA County saw 66,436 people experiencing homelessness, a 12.7% increase from 2019. Even though on average 207 people transition out of homelessness every day, 227 people become homeless. Seniors 62+ increased by 20% and make up 9.9% of the homeless population. Metro saw a 19% increase in Transition-Aged Youth (18-24) homelessness. Youths make up 7% of the homeless population. Incremental improvements are being made: 18,395 people experiencing homelessness in L.A. County were sheltered in 2020, up from 14,722 the previous year.

Homeless Count Key Messages (LA Homeless Services Authority)

WHAT CHALLENGES AND OPPORTUNITIES SHOULD METRO CONSIDER?

- A. **Shape a Transit-Oriented Los Angeles County:** Metro is among the leaders in the nation in having established a robust policy interest in fostering equitable transit-oriented communities. Building on the strong foundation set by the Transit-Oriented Communities Policy and Implementation Plan, and Joint Development Policy, Metro is uniquely positioned to start a dialogue about the ‘next generation’ integration of regional land use and transportation planning in partnership with local, regional, and state partners.

Metro’s multi-billion capital program is a transformational opportunity to strengthen the regional land use and transportation connection. Metro’s Long Range Transportation Plan shows that investing in new transit infrastructure and services and introducing supportive policies can incrementally decrease residents’ dependence on solo driving⁶. One additional supportive tactic that should be considered is for Metro to convene partners to strategize on regional land use planning needs and opportunities that encourage residential and job growth to be strategically focused on Metro’s bus and rail network. The opportunities may include:

- Collaborating with SCAG, and local and state partners to shape future iterations of regional growth projections and allocations in Los Angeles County
- Collaborating with SCAG to convene policy and research interests on regional land use and transportation integration in Los Angeles County and adjoining counties

⁶ The LRTP forecasts that the single occupant vehicle 24-hour mode share will decrease to 43 percent in 2047 from 46 percent in 2017, assuming scheduled build-out of capital projects in the sales tax measures and implementation of the following tactics: \$0.20/mile road usage charge, fareless transit for Metro and municipal transit services, increasing bus speeds by 30 percent, and reducing travel time on first and last mile connections by 20 percent.

- Monitoring regionally-significant land use proposals in Los Angeles County that may affect Metro’s system performance and performance targets (e.g. solo driving mode share, Vehicle Miles Traveled, transit ridership)
- Amplifying active efforts to monitor and engage, as appropriate, on legislation that supports Metro’s policy interest in fostering equitable regional land use and transportation integration in partnership with Los Angeles County municipalities.

Progress on Goal 4

Transform LA County through regional collaboration and national leadership.

Metro has been entrusted with improving LA County's transportation system, thereby helping the region to realize its full economic potential and delivering greater access to opportunity and improved quality of life for the County's 10 million residents. Metro shares the region's commitment to environmental sustainability and will take a strong leadership role in managing and building a resilient mobility system that effectively reduces greenhouse gas emissions and helps to address public health issues while moving people throughout the County. Achieving the vision and goals laid out in this Plan will require cooperation, coordination, and collaboration among Metro and its many partners and stakeholders.

Progress at a Glance:

The ultimate strength of a region lies not with what one single agency can do. Metro understands leadership is in large part about bringing diverse interests to the table, creating the conditions for consensus and for leaders to step forward, and holding each other to account. The NextGen Bus Speed Engineering Working Group is an example of Metro working in partnership with the Los Angeles Department of Transportation to realize the full benefits of the bus network restructuring under the NextGen Bus Plan. The Freight Working Group is another leading example of Metro convening diverse public, private, and community-based interests to shape a vision for regional goods movement that will take into greater account environmental and equity objectives.

Another component of leadership is to inspire and push for change to policy agendas at the state, regional, and national levels. The Office of Extraordinary Innovation has sparked a new way of thinking and doing within Metro and in the public transportation industry nationally and globally. When called upon, Metro has stepped up to serve in national efforts to respond to the COVID-19 pandemic and the federal administration transition. Metro's corporate sustainability and climate action efforts are ambitious and aligns well with the State of California's directives.

Regional leadership is even more important as the County emerges from the COVID-19 pandemic and economic downturn, and turns its attention to other crises, including global climate change. Ambitious action is required at all levels of government, the private sector, and individuals. Metro can play a leading role on this front by prioritizing investments and policies based on reducing county-wide vehicle miles travelled.

Longstanding policy tensions and dormant policy areas await resolution – a perfect role for Metro to play. As noted in Goal 1, the highway network must be a component of a broader systems mobility planning effort that includes setting a price on congestion. As noted in Goal 2, reprioritizing funding for operations and customer experience must be given more weight. As noted in Goal 3, the chronic shortage of affordable housing supply in the core areas of the County combined with the continued dispersal of regional growth to outlying areas will only stoke the demand for long distance driving and community demands for expanding highway capacity and long-haul transit services. Metro can play the convener role and be a thought leader on these and other issues. In addition, a medium-term legislative strategy can bring into sharp relief the necessary, but currently missing, tools to help Metro and its partners move on these regional challenges and achieve world class transportation outcomes.

HOW WILL METRO WORK WITH PARTNERS TO BUILD TRUST AND MAKE DECISIONS THAT SUPPORT THE GOALS OF THE VISION 2028 PLAN? [4.1]

- **We're convening partners from all levels of government to coordinate and exchange knowledge.** Metro convenes and participates in many working groups on numerous initiatives. Some examples that show the breadth of engagement are:
 - **Coordination with municipalities on bus speed:** the LADOT/Metro Bus Speed Engineering Working Group was established in 2019 to identify improvements for bus priority and opportunities to coordinate with other jurisdictions and transit operators. Early accomplishments arising from this working group include the Flower Street pop-up bus-only lane (which is now permanently installed), the Aliso bus-only lane, and the 5th Street and 6th Street bus-only lanes in downtown Los Angeles. Corridors under consideration for bus priority lanes include Alvarado Street (7th Street to Sunset Boulevard), Grand Avenue (southbound), and Olive Street (northbound). Metro is also exploring the viability of installing transit signal priority transponders on its entire 2,300 bus fleet.
 - **Goods Movement Strategic Plan Freight Working Group:** This working group was established in 2019 to inform Metro's preparation of the Goods Movement Strategic Plan (adopted 2021). Given the economic and environmental impacts associated with goods movement in Los Angeles County, the working group has over 60 representatives from all councils of governments in the county, the two ports, the air district, state and regional transportation agencies, private sector interests, and a community-based organization. The working group was instrumental in developing the vision and initiatives in the plan. Moving forward, the Freight Working Group will convene to support the implementation of specific initiatives and to discuss ongoing issues about regional goods movement in Los Angeles County.
 - **Knowledge Exchange on Transportation Technology:** With the rapid evolution of transportation technology, Metro benefits from staying engaged on these topics and playing a role in shaping the use of technology in advancing Vision 2028. For example, the Arterial Intelligent Systems Committee, made up of local public works engineers, increases mutual awareness of new technology applications that improve arterial operations and lessons learned from implementing and operating Intelligent Transportation solutions. At a broader level, Metro is a signatory, alongside SCAG, LADOT, Caltrans, and LA County Public Works, of the Coalition for Transportation Technology, which has developed a transportation technology strategic action plan and encouraged the sharing of technological information among partners. The Coalition provides an important forum for discussing the local and regional impacts of technology advancements, such as autonomous vehicles, and issues around regional consistency and interoperability.
- **We're integrating climate action and sustainability into our operations:** Metro recognizes the impacts of climate change. The 2019 Climate Action and Adaptation Plan sets a commitment to reducing greenhouse gas emissions from Metro's operations by 79% below 2017 levels by 2030 and by 100% by 2050. Metro's greenhouse gas emissions have declined by nearly 12% from 2010 to 2017, despite a nearly 4% increase in total transit services. In 2020, Metro took a further step by adopting the Moving Beyond Sustainability Plan, which includes additional holistic actions in the areas of: water quality and conservation, solid waste, construction materials, energy resource management, emissions and pollution control, climate adaptation, and economic and workforce development. These commitments are in addition to the Metro Board's goal to fully transition its bus fleet to zero emission buses by 2030, a full decade ahead of state requirements (the Board approved the Zero Emission Bus Rollout Plan in March 2021).

[Photo: Division 24 Gold L Line. LEED Certified building] See the Metro 2020 Moving Beyond Sustainability Strategic Plan for a full list of LEED-certified Metro projects.

[Data visual: Suggesting a chart:

Metro's Vehicle Fleets

The 2019 Climate Action and Adaptation Plan (CAAP) assesses emissions from Metro's diverse fleet both now and in the future. Metro has varying levels of control over our fleet:

- > Directly Operated Bus Fleet: About 2,400 buses owned and directly operated by Metro
- > Rail Vehicle Fleet: 104 heavy rail cars and 203 light rail cars operated on six Metro rail lines
- > Non-Revenue Fleet: 1,500 vehicles that support Metro operations but do not carry transit passengers
- > Contracted Bus Fleet: 175 buses operating under contract with Metro
- > Vanpool Fleet: 1,300 vanpool vehicles leased and operated by third parties subsidized through the Metro Vanpool Program

Metro also uses a variety of vehicle types and fuel sources:

- > Internal Combustion Vehicles: Vehicles using diesel, gas and compressed natural gas (CNG) in operations
 - > Electric Vehicles: Rail vehicles operating on electricity delivered by overhead catenary or third-rail systems, and battery electric buses (BEBs) and battery electric vehicles (BEVs) powered by electricity stored in a battery
- Source: 2019 Climate Action and Adaptation Plan (Los Angeles: Metro, 2020), 10.]

HOW WILL METRO HELP DRIVE MOBILITY AGENDAS, DISCUSSIONS, AND POLICIES AT THE STATE, REGIONAL, AND NATIONAL LEVELS? [Initiative 4.2]

- **We've taken on national leadership roles when called upon:** At the outset of the COVID-19 pandemic, Chief Executive Officer Phil Washington was appointed chair of the American Public Transportation Association's Mobility Recovery and Restoration Task Force. In late 2020, the Biden-Harris transition team appointed Mr. Washington to lead the team reviewing the Department of Transportation, National Transportation Safety Board, the National Railroad Passenger Corporation (Amtrak), and the Federal Maritime Commission.
- **We've have embraced the spirit of innovation:** When Chief Executive Officer Phil Washington created the Office of Extraordinary Innovation (OEI) in 2015, it sparked a new way of thinking and doing in the public transit industry. Many others soon followed his lead in embedding innovation into strategic planning and day-to-day operations. OEI initiatives, such as the Vision 2028 Strategic Plan, Unsolicited Proposals program, Public Private Partnerships program, Traffic Reduction Study, and Mobility on Demand pilot, have catalyzed and strengthened interdepartmental collaboration within Metro. Metro staff actively exchanges lessons learned with peer agencies around the country and beyond. Metro's Chief Innovation Officer is on the steering committee for the American Public Transportation Association's Chief Innovation Officer Peer Exchange, leading regular meetings on innovations in transit. Metro staff have published articles and white papers on various Metro innovations, and regularly speak to peer audiences in Australia, Singapore, The United Kingdom, and the European Union.

- **We're advocating for supportive legislation:** The successful implementation of Vision 2028 requires supportive legislation from the state and federal governments. Metro's 2021 legislative program includes the following priorities:

Examples from the Federal Legislative Program:

- Support the reauthorization of federal surface transportation authorization legislation (the current FAST Act expires on September 30, 2021)
- Seek to restore Obama-era reforms to federal local hire rules
- Support reforms to federal policies and funding that would benefit bus operations
- Advocate for policies and funding to assist in addressing regional homelessness

Examples from the State Legislative Program:

- Support the transportation funding programs created and expanded under Senate Bill 1
- Support increased transportation funding, including from the state's cap and trade program
- Support and sponsor legislation that will address transit customer experience, project delivery, climate action, affordable housing production, regional homelessness, ExpressLanes expansion, etc.

- **We're rethinking our highway funding programs:** Timing is everything in transportation. Both the Biden-Harris administration and Metro are willing to rethink and modernize the way transportation is done. The proposed Biden-Harris American Jobs Plan, released in early 2021, would greatly expand transit investments to a level that is greater than that for roads and highways. Locally, the Metro Board, in 2020, appointed a subcommittee of Board staff to identify recommendations that Metro should take to modernize its Highway Program, taking into account Board-adopted policies, such as the Complete Streets Policy, Active Transportation Strategic Plan, and First/Last Mile Strategic Plan. The main revisions proposed expand eligibility for multimodal projects that support Complete Streets, and projects that ease congestion by reducing VMT. In March 2021, the Board approved for public comment the draft amendments to the Measure R Highway Program eligibility criteria and Measure M Guidelines, Section X Multi-Year Programs (Highway Subfunds). Following public input, a final revised set of program criteria and guidelines will be presented to the Board for adoption in June 2021. Metro's effort represents an incremental step in the right direction.

WHAT CHALLENGES AND OPPORTUNITIES SHOULD METRO CONSIDER?

- A. **Take Regional Climate Action:** The stage is set for an alignment of federal, state, and local responses to global climate change. One of the priorities of the Biden-Harris Administration is to confront climate change at the national and global levels⁷. The State of California has been at the forefront with climate legislation, such as SB 375 and SB 743. In Los Angeles County, on-road transportation is responsible for one-third of the county's greenhouse gas emissions⁸. Building on the 2019 Climate Action and Adaptation Plan and 2020 Moving Beyond Sustainability Plan, Metro can be a trailblazer by integrating regional vehicle miles travelled reduction objectives in future updates to Vision 2028, policies, funding programs, and investment decisions.
- B. **Match Actions to Policy:** The process of aligning Metro's policies, investments, and funding across the portfolio of mobility services is an incredible challenge. The recent effort by the Board to expand the eligibility of Metro's highway programs shows that it is possible to revisit past commitments and entertain

⁷ In April 2021, President Biden pledged to cut U.S. greenhouse gas emissions by at least 50% below 2005 levels by 2030. The new target is a near doubling of former President Obama's target to cut emissions by 26 to 28 percent.

⁸ <https://www.ioes.ucla.edu/wp-content/uploads/report-card-2015-energy.pdf>

some degree of reform. The next step is to confront the longstanding tension of expanding highway capacity, such as potential segments of I-605 and I-5, and the aspirations for reducing solo driving and shrinking the County's climate footprint. As noted in Goal 1, the planning of the highway network must be a component of a broader mobility system that includes setting a price on congestion and incentivizing non-solo driving trips. As noted in Goal 2, reprioritizing funding for operations must be given more weight. And, as noted in Goal 3, the continued dispersal of regional growth to the outlying parts of the County will only serve to stoke the demand for long distance driving and the demand for expanding highway capacity and long-haul transit. Metro can choose to strike a new course, or continue with the status quo and expect a different outcome.

- C. Prepare a Medium-Term Legislative Strategy:** Building on Metro's annual legislative program, a medium-term strategy (e.g. four or five-year horizon) will help prioritize and target specific legislation and, if accompanied by an updated Vision 2028, would sharpen alignment with policy.

Progress on Goal 5

Provide responsive, accountable, and trustworthy governance within the Metro organization.

To deliver the best possible mobility outcomes, Metro itself—as an organization—must be positioned to succeed. Responsive, accountable, and trustworthy governance is critical to continue building credibility with decision-makers, public and private sector partners, customers, and employees. By improving its business practices, Metro can perform more effectively and adapt more nimbly to the changing needs of its customers.

Progress at a Glance:

Metro embraces the enormous responsibilities as a steward of billions in funding generated by local taxpayers and from grants awarded by the state and federal governments. This is why Metro is constantly looking at ways to deliver better value for the travelling public, such as the Better Bus program and NextGen Bus Plan, reviewing opportunities to manage the cost of rail projects, and harnessing the knowhow and expertise of the private sector for the public good. Metro is also actively improving how it works internally and with external partners, whether it is developing a data management policy, creating opportunities for local businesses to work with Metro, or nurturing an inspired workforce with safety top of mind and practice.

The visionary outcomes in Vision 2028 will, however, remain aspirations until there is full alignment, from top to bottom, within the organization in how decisions are made and actions are coordinated. It starts with a strategic review of the way Metro is organized internally and making sure staff resources and decision-making processes are working in sync to make high quality public policy and fiscal decisions. It involves standing up a centralized hub to coordinate basic data collection and planning analytics so that decision-makers have ready access to crucial information to aid deliberations. It also includes ways to accelerate the retention of institutional knowledge and creating leadership pathways to counteract a rapidly aging workforce and declining labor pool.

On the fiscal front, a true organizational alignment to Vision 2028 means delivering to the Board a unified medium-term financial strategy in a Short Range Transportation Plan that shows the match between funding levels and investment needs. It also means exploring best practices to assess the full life-cycle costs of major capital projects and to maximize their benefits from planning to construction to operations to asset management.

Delivering world class transportation requires an organization that is ambitious, innovative, and willing to learn and adjust its priorities in the face of changing circumstances while still keeping track of its mission.

HOW WILL METRO LEVERAGE FUNDING AND STAFF RESOURCES TO ACCELERATE THE ACHIEVEMENT OF GOALS AND INITIATIVES PRIORITIZED IN THIS VISION 2028 PLAN? [Initiative 5.1]

- **We're securing billions of dollars in state and federal transportation grants for the county:** Metro is a leader nationwide with success in securing billions of dollars in state and federal funding sources in recent years. Metro has brought in over \$3 billion in state and federal grants since March 2020, and is currently managing over \$9 billion in grant activities. This activity is an extensive and crucial for the delivery of Metro's multibillion capital program.

HOW WILL METRO EXERCISE GOOD PUBLIC POLICY JUDGMENT AND SOUND FISCAL STEWARDSHIP? [Initiative 5.2]

- **We're exploring ways to better manage the rising cost of rail projects:** Metro has been undertaking research to identify key factors escalating rail project costs and ways to manage costs, schedules, and scopes, while still preserving the project's intended benefits. Some of these cost factors are: the higher risk associated with megaprojects priced into contracts, increasing technological complexity, rising contractor claims, grade separations, lengthy environmental review processes, project management and soft costs, mitigation of community impacts during construction, and so on. Metro's ambitious capital program, including the Twenty-Eight by '28 initiative, should be regularly reviewed and, where necessary, be adjusted to current and forecasted fiscal realities (see the Challenges and Opportunities section for more discussion).
- **We've reimaged the bus network to deliver more effective service for more of our existing customers:** The NextGen Bus Plan, the culmination of three years of extensive community engagement and data analysis, restructured the Metro bus network for the first time in a quarter century. The NextGen Bus Plan will deliver a faster and frequent bus system that better serves Los Angeles County (see Goal 1 for more details). For areas of the County that may see reduced bus coverage or frequency, Metro is deploying Metro Micro, an on-demand service using shuttle vans that provides more customized rides. 6 Metro Micro zones were launched in 2020, and 3 more will be launched by end of 2021. Metro continues to work with its municipal partners to plan for and implement transit priority measures, such as bus lanes and signal priority, so that the benefits of restructuring the bus network are maximized and sustained over the long term.
- **We're working to review and improve the cost efficiency of the Metro Bike Share Service:** In 2020, Metro completed an internal audit of the Metro Bike Share Program, which has been providing first and last mile connections in multiple municipalities in the County since 2016. One of the findings was that the current firm-fixed-price contract, while putting maximum risk on to the contractor for managing costs, is not the most suitable in this specific instance. The reason being the milestones were developed by the contractor after the execution of the original contract and subsequent contract modifications made it challenging to determine if the fixed price was based on reliable estimates. The audit determined that cost-reimbursement types of contracts, which provide for payment of allowable costs as they are incurred, should be assessed and considered. They could allow Metro to exercise more control and oversight over the performance of the contractor. A recommended future program option will be presented to the Metro Board in Summer 2021 (the current contract expires in July 2022).

HOW WILL METRO DEVELOP A TRANSPARENT DATA MANAGEMENT POLICY THAT ADDRESSES OPEN DATA, DATA STORAGE, AND DATA PROTECTIONS? [Initiative 5.3]

- **We're developing a data management policy:** Like all public agencies, Metro creates, stores, and manages a lot of data, such as TAP card transactions, vendor information, and financial information. Progress is being made on a data management policy that will, among other features, provide a basic template for departments across the agency to structure and manage their respective datasets. A common data warehouse is being explored as a common repository for all data in the agency.

HOW METRO WILL APPLY PRUDENT COMMERCIAL BUSINESS PRACTICES TO CREATE A MORE EFFECTIVE AGENCY. [Initiative 5.4]

- **We're harnessing private sector innovation for the public good:** Good ideas about how to deliver a world class transportation system can come from both the public and private sectors. Metro is able to tap into private sector know-how in the following ways:
 - **Unsolicited Proposals:** Proposers can submit an unsolicited proposal for small and large projects that may improve mobility and/or the customer experience. Proposals are reviewed by Metro, and if a concept offers promise, Metro may seek to implement it or ask for more information to conduct a comprehensive assessment. Proposals can lead to no cost proof-of-concepts to help test new approaches and technologies, and inform the case for implementation. A recent example is the Los Angeles Aerial Rapid Transit project – a gondola system connecting Union Station and Dodger Stadium that was submitted to Metro by a private consortium in 2018 (for this project, Metro is acting as the lead agency for the environmental review process, which will include the evaluation of the proposal and alternatives).
 - **Public Private Partnerships (P3s):** For major capital projects, P3s can be a means to improve the delivery and performance of major capital projects by way of innovative project financing, project design, and operations. The Sepulveda transit corridor project is an example of a P3 initiative.
 - **Joint Development:** Metro accepts unsolicited proposals for joint land use development on Metro-owned sites. Joint development can be a win-win scenario for creating equitable transit-oriented development and generating transit ridership (see Goal 3 for more details about Metro's Joint Development Policy and pending update).
- **Exploring new ways of mitigating risk and maximizing the public good:** For megaprojects costing in the billions of dollars and having a significant amount of technical complexity, striking the balance on risk, innovation, and public benefit is crucial. For the Sepulveda Transit Corridor Project, the Metro Board approved contracts with two private sector firms for Pre-Development Agreement work using a first-of-its kind public-private model. This megaproject will connect the San Fernando Valley with the Westside and eventually LAX via a high-speed, high-capacity transit line. The capital cost could range from \$6 billion to \$11 billion. Metro will now initiate the environmental review process where concept designs will be advanced and refined through extensive community engagement and technical analysis. Metro retains the right to continue or terminate either partnerships depending on the acceptability of a Locally Preferred Alternative (LPA) to be selected by the Metro Board. Should a LPA be selected, one of the private sector teams may have an opportunity to submit a proposal to implement the project. Pre-Development Agreements enable early contractor involvement to allow for innovations in design, engineering, construction methodology, financing, and operations.

[Data Visuals: Unsolicited Proposals statistics]

Overall UP Statistics

	Total	Since 2018
Received	244	149
Advanced to Phase II	31	14
Advanced to Proof of Concept	9	4
Advanced to Implementation/Implemented	19	8

List of UP Projects Implemented/in Implementation (2018-2021):

2018-Present	Proposer
Artificial Ivy Anti-Graffiti	Intuitive Real Estate
Cybersecurity Program (partial)	FireEye
Los Angeles Aerial Rapid Transit	LAART, LLC
Automated Bus Lane Enforcement	CarmaCam
Travel Rewards	7 Different Proposers (Think You Can Solve Traffic?)
Augmented Reality Training (deferred)	Knowledge Architects
Project Neutral Visuals (deferred)	Alta Planning + Design
Elevator Inspections	BV-NEIS

List of Proofs of Concept as a result of an Unsolicited Proposal (in order of receipt):

2018-Present	Proposer
Automated Bus Lane Enforcement	CarmaCam
Wayfinding for Visually Impaired	Navilens
Lightweight Congestion Pricing (deferred)	ClearRoad
Anti-microbial/viral/bacterial/fungal Copper	The Clean Copper Company

HOW WILL METRO EXPAND OPPORTUNITIES FOR BUSINESSES AND EXTERNAL ORGANIZATIONS TO WORK WITH US? [Initiative 5.5]

- **We’re making ways for small businesses to help us build a world class transportation system:** Between fiscal years 2018 and 2021, Metro awarded contracts to 2,329 small businesses for a total amount of \$1.2 billion, expanding the network of businesses that contract with Metro. Metro holds workshops and information sessions every month through the MetroConnect program on topics such as “How to Do Business with Metro” and “Meet the Primes.” These sessions help build awareness about upcoming contracting opportunities and foster connections between prime contractors, sub-contractors, and buyers. While all meetings were conducted virtually in 2020, Metro was still able to engage over 6,000 individuals. Also, Metro continues to support the Transportation Business Advisory Council, comprising 21 minority or women-based business organizations, which provide advice on ways to meet or exceed women and minority business enterprise participation goals.

Metro expanded the Transitional Indirect Cost Rate Policy and pilot program in March 2020 in support of removing financial management barriers inhibiting new, disadvantaged and small businesses. The policy extends the opportunity for qualifying disadvantaged and small businesses voluntary use of a transitional rate of 115% for a conditional period of 12 months from initial contract award. The expansion of the policy to new cost reimbursable and firm fixed contracts furthers Metro’s commitments to creating pathways for

disadvantage and small businesses to compete and realize economic benefits. As a result of the expanded policy and pilot program, the rate of participation increased by over 200% within the first year. Metro will continue to assess the pilot program.

In the spirit of continuous improvement and to better respond to the current economic distress caused by the pandemic, the Board directed staff to review Metro's Medium-Size Business Enterprise Program and Small Business Enterprise Program in January 2021, and to identify potential enhancements by April 2021.

HOW WILL METRO WILL FOSTER AND MAINTAIN A STRONG SAFETY CULTURE? [Initiative 5.6]

- **We're prioritizing employee safety:** The Law Enforcement Service Request, launched in 2019, is an internal Metro online program (accessible on all computers) that allows an employee to report incidents of harassment observed or experienced on the transit system. The requests are routed to the appropriate parties, such as law enforcement, for their action. Metro also completed the installation of barriers on buses for operators to address safety concerns. All new buses purchased are equipped with barriers and monitors as well.

Data Visual: Photo of operator sitting on bus with barrier.

[Data visual: Operator Assaults: 2018 - 85 cases; 2019 - 106 cases; 2020 - 80 cases. Source: Metro Safety, Security and Law Enforcement Dept, February 2021]

- **We're prioritizing employee wellness:** In 2016, Kaiser Permanente reported alarming health statistics for Sheet Metal, Air, Rail and Transportation (SMART) employees at Metro:
 - 11% of SMART workers had high blood pressure compared to the national average of 8%
 - 61% of SMART workers had a body mass index in the obese range compared to the national average of 38%

In response to these and other health metrics, in 2018, the SMART-MTA-TCU Wellness Program began to focus its efforts to respond to these alarming health metrics. With multiple healthcare providers involved, the Wellness Program seeks to boost employee health and morale through mental, physical, and financial health initiatives throughout the year. An annual wellness plan is created every year. In 2021, the Wellness Program will emphasize lowering blood pressure and providing mental health support, in addition to ongoing educational programming on healthy diets, nutrition, and physical exercise. Sample online-based initiatives in 2021 include the Metro Fit Club Weight Loss Challenge, virtual 5k Run/Walk, and virtual Health Fairs. Metro also offers the Employee Assistance Program which provides resources to employees experiencing personal problems that might affect their work performance. For example, requests for financial assistance rose from 3% in Spring 2020 to 12% in Summer 2020, likely attributable to the financial impacts of COVID-19 on households.

HOW WILL METRO BUILD AND NURTURE A DIVERSE, INSPIRED, AND HIGH-PERFORMING WORKFORCE? [Initiative 5.7]

- **We're listening and following up with our 11,000-strong team:** All Metro employees were invited to complete surveys in 2017 and 2019 to provide feedback that can help improve their workplace and work experience. The surveys helped management understand how employees feel about the organization, what

strengths can build, and where there are opportunities to improve. The findings have informed specific areas for improvement, from work performance to safety, trust, diversity and inclusion, communications, training opportunities. In light of the impacts that COVID-19 has had on Metro staff, new rounds of employee surveys will be necessary to gauge what work policies work well, what needs improvement, and what issues deserve attention moving forward. Preparation is underway for a 2021 wellness survey to evaluate potential shifts in employee attitudes and perceptions since the onset of the COVID-19 pandemic; the survey feedback will help Metro, its labor partners, and healthcare providers identify and tailor services to areas where employees may need additional support.

[Sidebar: In response to the 2017 and 2019 Employee Surveys, Metro’s Office of Civil Rights and Inclusion established a Diversity & Inclusion unit in February 2020. This unit launched the Courageous Conversations online series in March 2020 as a temporary measure to provide employees with implicit bias training. Beginning July 2021, an online Unconscious Bias course will be made mandatory for all employees. Metro is developing a Diversity & Inclusion Council to begin convening in FY22. The Council will include a representative group of full-time contract and non-contract employees to recommend, implement, and promote strategies to advance diversity and inclusion with the agency.]

- **We’re building leadership capacity within the organization:** Metro offers numerous leadership training opportunities to employees, such as the Leadership Academy, EnoMAX, and the Women and Girls Governing Council. Graduates of these programs are called upon to play key roles, such as the COVID-19 Recovery Task Force and Fareless System Initiative. With such a large workforce, supervisory training is also important. In early 2021, a new supervisor training program was introduced agency-wide. Training the next generation of leaders cannot be taken for granted, especially for an agency with an aging workforce and 50% of employees eligible for retirement by 2024.

Metro’s five Employee Resource Groups provide pathways for staff to advance Metro’s diversity and inclusion goals. For example, the African-American Employee Association, the Association for the Advancement of Latinos at Metro, the Filipino American Employee Association, Metro Emerging Professionals Association, and OUT@Metro (LGBTQIA+) worked collaboratively to develop a Statement of Unity in response to the violence occurring towards people of color and other marginalized groups in the recent past.

Overall, 89 out of 184 participants (48%) have received a promotion since joining the Metro Leadership Academy.

[**Sidebar:** Metro provides a menu of professional development opportunities to all employees: Leadership Academy, ENO Multi-Agency Exchange, Office of Extraordinary Innovation Fellowship, MAX Program, Women and Girls Governing Council, ECSD's Envision & GPro Certification. Metro provides a generous tuition-reimbursement program for employees to pursue higher education and advanced degrees in relevant fields.]

- **We're embracing a gender balanced workforce:** Metro's Women and Girls Governing Council was established in 2017 to analyze how Metro's programs, services and policies impact the lives of women and girls in LA County. This volunteer council is a diverse group of 60 Metro employees representing every department—union and non-union, entry level to executive— and serve to provide recommendations to the CEO on how to help advance and empower women and girls. The Council applies a gender lens in three focus areas: Metro as an employer, Metro as a service provider and Metro as a catalyst for economic development. The goals of the Council are:
 - To have a gender balanced workforce;
 - To accelerate change because progress for women is progress for everyone; and
 - To not seek just one solution, but a comprehensive strategy to address the complex and inter-related causes of gender inequity, mobility and economic challenges.

[**Side bar:** One of the major deliverables of the Women and Girls Governing Council was the groundbreaking 2019 study, "Understanding How Women Travel".]

Gender Split of Metro Bus and Rail Riders

Source: Metro On-Board Survey (Spring 2018)

Gender Split of Riders Over Time

Source: Metro On-Board Survey (2010-2018)

[**One photo** from the WGGC Metro Art Michele Asselin exhibition, Forward Motion, women working in transportation at Metro.]

- **We're making it easier to apply for a job at Metro:** A new user-friendly job application system will be introduced in 2021 to allow for better communication between Metro and prospective employees. To mitigate implicit bias, blind screening was introduced in 2020 to ensure job candidates are evaluated based on their knowledge, skills, and abilities (and not on personally identifiable information that may contribute to bias). Interview panelists are also required to undergo implicit bias training.

- **We're monitoring the hiring process to ensure equity:** When a department seeks to recruit for a position, the hiring manager is provided real-time data about their department's workforce demographics in comparison to the outside labor market, diversity goals, and targeted outreach requirements to help ensure a diverse applicant pool. All interview panels are diverse in race/ethnicity and gender and have at least three panel members to weigh in on the best candidate. Relevant employment material and data from the recruitment process are reviewed to ensure the process is free from discrimination and bias. From recruitment to onboarding, Metro strives to make sure the process is fair, equitable, and in alignment with Metro's diversity goals.

WHAT CHALLENGES AND OPPORTUNITIES SHOULD METRO CONSIDER?

- A. Establish a Data and Planning Analytics Hub:** Evidence-based decisions begins with having access to comprehensive and current data. Otherwise, decisions about policies, programs, and investments can suffer. Each department in Metro is currently responsible for their data and upkeep. Oftentimes, different departments have similar data and analytics needs, but rather than coordinating, efforts are duplicated, thereby creating inefficiencies. A centralized data and planning analytics hub within Metro can:
- standardize and coordinate basic data collection and planning analytics;
 - produce a comprehensive performance baseline report and dashboard;
 - provide barrier-free access to non-confidential data for agency partners and the public; and,
 - collaborate with SCAG on its Regional Data Platform initiative⁹.

Assembling an efficient and service-oriented Data and Planning Analytics Hub within Metro may mean refocusing existing staff roles and expanding staff resources.

- B. Prepare a Medium-Term Financial Roadmap:** In addition to Metro's annual budget, which sets out the funded priorities in the immediate future, Metro produces a medium-term financial roadmap of the planned delivery of projects, programs, and services over the next decade in the Short Range Transportation Plan. This plan is one additional tool to help Metro achieve and maintain financial stability. To aid decision-makers more broadly, the medium-term financial roadmap should be tabled for discussion with the Board of Directors on a yearly basis so that there is a clear-eyed look into forecasted revenues and costs, and the implications for Vision 2028 goals.
- C. Review Organizational Alignment with Vision 2028:** Metro's ambitious work program is powered by the availability and deployment of staff and financial resources. With the transition in leadership at Metro, it may be an appropriate time strategically review the organization for its internal alignment to implementing Vision 2028. Some considerations are:
- Identifying organizational values to shape and communicate an organizational culture that will advance Vision 2028 implementation
 - Reviewing Metro's commitments in relation to resource constraints
 - Reviewing the organizational structure and internal processes with a view to improving strategic coordination, performance management, and continuous improvement
 - Integrating equity and climate action objectives into policy and investment decisions
 - Embracing the role of transportation to not only serve demand, but to shape demand in communities across the County through active engagement on regional land use and growth topics.

⁹ <https://storymaps.arcgis.com/stories/42984065691d4006852e4b02e5475452>

- D. Explore Best Practices to Assess Full Life-Cycle Costs and Maximize Benefits:** Metro's capital program has numerous rail and highway projects on deck for construction over the next three decades. These projects span many years and costs hundreds of millions, if not billions, of dollars. Ensuring that the benefits of these projects are maximized and maintained throughout their lifecycles, from early alternatives analysis and all the way through to construction and operation, may warrant exploring best practices from peer transport agencies to refine Metro's current approach to planning, program management, operations, and asset management.
- E. Retain Institutional Knowledge and Replenish Talent:** Nearly 50% of Metro's workforce will be eligible for retirement by 2024. An aging workforce, the new Metro employee buy-out program, and the current pandemic are increasing the rate of staff turnover and affecting recruitment. In particular, Metro's Voluntary Separation Incentives Program is increasingly seen as an opportunity to save on operating costs and to redirect those funds to other operating costs. Unless succession planning efforts are accelerated and expanded, the continual loss of expertise and institutional knowledge will seriously impact Metro's ability to deliver on its commitments.

Summary of Strategic Opportunities

This section summarizes the strategic opportunities identified within each goal chapter. Further dialogue will be required in most instances before action can be taken. The future update to Vision 2028 is an appropriate place to deliberate these possibilities.

GOAL 1: Provide high-quality mobility options that enable people to spend less time traveling.
<ul style="list-style-type: none"> A. Plan and Deliver Mobility as a System of Interlocking Parts B. Deepen Partnerships with Municipalities to Deliver World Class Transportation C. Address the State of Good Repair Backlog D. Develop a Comprehensive Pricing Framework
GOAL 2: Deliver outstanding trip experiences for all users of the transportation system.
<ul style="list-style-type: none"> A. Identify Sustainable Funding for Customer Experience, Transit Operations, Safety, and State of Good Repair B. Develop a Community-Based Approach to System Security and Law Enforcement
GOAL 3: Enhance communities and lives through mobility and access to opportunity.
<ul style="list-style-type: none"> A. Shape a Transit-Oriented Los Angeles County
GOAL 4: Transform Los Angeles County through regional collaboration and national leadership.
<ul style="list-style-type: none"> A. Take Regional Climate Action B. Match Actions to Policy C. Prepare a Medium-Term Legislative Strategy
GOAL 5: Provide responsive, accountable, and trustworthy governance within the Metro organization.
<ul style="list-style-type: none"> A. Establish a Data and Planning Analytics Hub B. Prepare a Medium-Term Financial Roadmap C. Review Organizational Alignment with Vision 2028 D. Explore Best Practices to Assess Full Life-Cycle Costs and Maximize Benefits E. Retain Institutional Knowledge and Replenish Talent

Status of Actions (as of April 2021)

Vision 2028 outlines 75 specific actions. The actions are intended to provide detailed guidance on the type and level of effort required to achieve the vision of a world class transportation system in Los Angeles County. And, because these original actions do not represent the full breadth of Metro’s work program, additional actions are included below to show the level of effort that is underway or completed since 2018.

The status of these actions are shown below.

- **Completed (C):** substantial completion
- **In Progress (I):** underway or is an ongoing effort for reasons stated
- **On Hold (O):** minimal progress for reasons stated
- **Not Started (N):** no progress for reasons stated.

Action #	ACTION	C	I	O	N	Related Goals	Notes
Visionary Outcomes							
1	Establish baseline mode share for all trips			X			Metro will explore different data sources to prepare a baseline for mode share in Los Angeles County: <ul style="list-style-type: none"> • Procurement for location-based services data pilot is going to the Metro Board for approval in May 2021 • 2020 US Census commuting data will be released in 2022 • SCAG household travel survey will be initiated in 2022
2	Establish mobility standards, benchmark current condition, and identify gaps: <ul style="list-style-type: none"> • Ensuring that all County residents have access to high-quality mobility options within a 10-minute walk or roll from home; • Reducing maximum wait times for any trip to 15 minutes during any time of day; • Improving average travel speeds on the County’s bus network by 30%; and • Providing reliable and convenient options for users to bypass congestion. 		X				Long Range Transportation Plan (2020) contains a comprehensive list of performance measures depicting 2017 baseline performance and forecasted performance for 2047.
Goal 1 – Provide high-quality mobility options that enable people to spend less time traveling							
Initiative 1.1A Target infrastructure and service investments towards those with the greatest mobility needs							
3	Implement equity framework and adopt performance metrics; incorporate into practices at Metro		X			2, 3, 5	Appointed first Equity and Race Executive Officer, developed Metro Budget Equity and Assessment Tool (MBEAT) for use during budgetary decisions, adopted Equity Focus

Action #	ACTION	C	I	O	N	Related Goals	Notes
							Communities definitions, developing Metro Equity Tool. Equity performance metrics are being identified in collaboration with Planning, Office of Management & Budget, and equity liaisons.
Initiative 1.1B Expand the transportation system as responsibly and quickly as possible							
4	Long Range Transportation Plan schedule for Measure R and M	X				2, 3	Adopted update to the LRTP, the agency’s funding plan from 2017 to 2047, inclusive of schedule for Measure R and M projects
5	Advocate for accelerated resources, particularly from the state and federal government, to deliver the 28x2028 projects		X			3, 4, 5	Ongoing efforts underway to obtain grants for 28x2028 projects
Initiative 1.2A Invest in a world-class bus system that is reliable, convenient, and attractive to more users for more trips.							
6	Allocate resources in 10-year Strategic Budget Plan for World Class Bus* implementation		X			2, 3, 4	<p>Now referred to as the Better Bus Program, which aims to help advance NextGen and address other aspects of the bus experience, including improving speed, ease, safety and comfort.</p> <p>The medium-term resource requirements to implement the Better Bus program and NextGen Bus speed and reliability improvements have been identified, and a financial plan is under development.</p> <p>Expanding sustainable funding for transit operations is a strategic opportunity (see Goal 2 chapter).</p> <p>Preparing a 10-year (or medium-term) financial plan is also a strategic opportunity (see Goal 5 chapter).</p>
7	Improve Metro Local travel speeds to 15 mph		X				<p>Given the adoption of the NextGen Bus Plan in 2020, Metro Rapid services have been eliminated.</p> <p>Metro is focusing on reducing overall travel time in the transit network by <i>optimizing all components</i> of the trip, including accessing the bus stop, waiting, and riding. We plan to make the network more competitive and attractive by investing in fast, frequent and reliable service, especially during the midday, evenings and weekends when the greatest opportunity to grow ridership exists.</p>
8	Improve Metro Rapid speeds to 18 mph						No longer applicable, see Action No. 7 for more information

Action #	ACTION	C	I	O	N	Related Goals	Notes
9	Convert strategic Metro Rapid corridors to bus rapid transit corridors						No longer applicable, see Action No. 7 for more information
10	Conduct NextGen Bus Study	X				2, 3	NextGen Study was complete and adopted in 2020. Implementation underway. Network restructuring is underway and will be complete by September of 2021
11	Conduct Metro Bus Rapid Transit (BRT) Vision and Principles Study, including development of Bus Rapid Transit design guidelines, performance metrics, and prioritized list of corridors	X				3	BRT Vision and Principles Design Guideline Manual and top 5 recommended BRT corridors adopted in 2021
12	Identify congestion hot spots for critical/core bus corridors		X			2, 3, 4	Bus Speed and Engineering Working Group is identifying arterial-based improvements on bus corridors.
13	Implement transit priority measures (e.g., signal priority, queue jumps, exclusive lanes, and congestion hot spot mitigations) for bus corridors		X			2, 3, 4	Bus Speed and Engineering Working Group is identifying arterial-based improvements on bus corridors
14	Align transit network with future land use plans to determine best mitigation approaches to improve bus operations			X		3, 4	The Transit-Oriented Communities Implementation Plan, adopted in 2020, will create opportunities to align local land use plans and Metro’s transit network. Regionally, the integration of land use and transportation is a strategic opportunity (see Goal 3 chapter).
Initiative 1.2B Partner with Metrolink to increase the capacity of the regional transportation system							
15	Work with the Southern California Regional Rail Authority (SCRRA) to provide more frequent and reliable Metrolink services, improve customer satisfaction, and support better transit connections throughout the network		X			2, 3, 4	Metro is a partner in SCRRA’s Southern California Optimized Rail Expansion (SCORE) program, a \$10 billion capital program to upgrade Metrolink’s passenger rail service through 75 different projects across six counties
16	Build a state-of-the-art, condition-based asset management practice for maintaining all mission-critical assets to the highest performance standards and upgrading to current technologies		X			2, 5	Phase 1 procurement and installation of software solution is complete. Phase 2 implementation will be completed by 2023/24.
17	Define guidelines for performance outcomes of full transportation network	X				2, 5	LRTP contains forecasted performance outcomes to 2047.
18	Update funding guidelines for local and municipal transit providers to align with achieving goals of Metro Vision 2028 Plan				X	2, 3, 4, 5	Provisions in Measure R and Measure M make it impractical to update funding guidelines affecting municipal transit providers.
19	Incentivize Metro funding program recipients to contribute to achieving the mobility goals of the		X			2, 3, 4, 5	Metro will consider adopting proposed amendments to the Measure R Highway Program eligibility criteria and Measure M

Action #	ACTION	C	I	O	N	Related Goals	Notes
	transportation network per the Metro Vision 2028 Plan						<p>Guidelines, Section X Multi-Year Programs (Highway Subfunds) in June 2021. The main revisions proposed are to expand eligibility to multimodal projects that support complete streets, and projects that ease congestion by reducing VMT.</p> <p>Metro is partnering with local municipalities to prepare first last mile plans to incentivize investments to improve connectivity. Metro administers the Metro Active Transportation funding program to provide further incentives and support to local municipalities.</p> <p>The Better Bus program is also developing incentives to spur cities to add bus stop shelters and other amenities.</p> <p>More broadly, municipalities have direct control over supportive policies, such as land use and affordable housing, parking supply requirements, transit priority measures, complete streets, and design review, that are material to the effectiveness of Metro’s services. Deepening partnership with municipalities is a strategic opportunity (see Goal 1 chapter).</p>
20	Update Metro design standards to improve connectivity between transit lines and connecting modes for all transit facilities		X			2	Metro updates design guidelines and standards on an ongoing basis, such as the Transfers Design Guidelines (2018)
21	Update plans to create clear, comfortable, and user-friendly transfers at all major connection points		X			2	Metro’s Customer Experience Plan (2020) and BRT Vision and Principles Design Guideline Manual (2021) prioritize user-friendly experience improvements at major transit connection points.
22	Collaborate with municipal partners to establish policies to prohibit curb congestion in bus corridors		X			2, 3, 4	<p>The Bus Speed and Engineering Working Group is identifying arterial-based improvements on bus corridors.</p> <p>Proposed Assembly Bill 917 would authorize any public transit operator to enforce parking violations in specified transit-only traffic lanes through the use of video imaging and to install automated forward facing parking control devices on public transit vehicles. Metro advocated for state-wide enabling legislation.</p>
23	Use improvements in technology, equipment, and infrastructure to		X			2, 3, 5	Procured and installed new Enterprise Safety Management System software. Full system

Action #	ACTION	C	I	O	N	Related Goals	Notes
	improve safety on Metro transit network						<p>implementation will be completed by 2023/24.</p> <p>Reviewing SmartDrive video event trends to identify safety issues month over month and year over year to work toward improved safety trend.</p> <p>Installing SmartDrive on Rail fleet so safety improvements can be measured fleetwide (bus and rail).</p>
24	Update funding program criteria to prioritize projects that improve safety and reduce conflicts between different users of the roadway while improving system integration and maximizing person throughput		X			2, 3, 4, 5	<p>Metro Active Transportation Program Cycle 1 was approved by the Board in 2021 totalling \$63 million to fund first/last mile projects. Safe connections for walking and cycling is a priority. Proposed amendments to Measure R and Measure M highway funds will include expanding eligibility for complete streets projects.</p> <p>In January 2021, the Metro Board approved a resolution directing staff to develop a Street Safety Policy, encompassing strategies to reduce injuries and deaths, the creation of a countywide data collection program to document and analyze transportation-related serious injuries and fatalities, and an assessment of internal risk and liability for the safety of all Metro mobility services</p>
25	Develop and execute a legislative strategy to improve passenger and transit vehicle safety through policy and regulatory actions at all levels of government		X			4, 5	Ongoing. One example is Metro’s advocacy for state-wide enabling legislation to authorize public transit operators to enforce parking violations in transit-only lanes through the use of video imaging and forward facing parking control devices on transit vehicles. Assembly Member Bloom has introduced AB917.
26	Conduct comprehensive transportation system pricing study to determine options for meeting four goals of equity, ridership, revenue, and security			X		2, 3	The Comprehensive Pricing Study was initiated in 2020; currently on hold pending outcomes of Fareless System Initiative and directions from the Board.
27	Implement transportation system pricing policy based on study				X	2, 3	Subject to the restart and completion of the Comprehensive Pricing Study.
28	Implementation of ExpressLanes Tier 1 network		X			2, 3	Most Tier 1 segments are in the environmental review stage.
29	Test and implement pricing strategies to reduce traffic congestion. Pilot study to identify best locations for proof of concept		X			2, 3, 4	Traffic Reduction Study is underway and will recommend a proposed pilot program by 2022.

Action #	ACTION	C	I	O	N	Related Goals	Notes
							Travel Rewards Research Pilot will test monetary incentives to encourage less solo driving.
30	Implement pilot program				X	2, 3, 4	Subject to Board approval, a pilot program could begin in 2025
31	Develop strategy to increase rapid transit capacity and consider strategies to price all vehicle travel to manage congestion				X	2, 3	Rapid transit planning and road pricing are addressed in separate initiatives. More broadly, developing a system-wide mobility plan for transit and transportation (bus, rail, on-demand service, micromobility, walking, arterials, and highways) is a strategic opportunity (see Goal 1 chapter)
32	Possible legislative and regulatory strategies for leveling the playing field to preserve competition, reduce negative effects, and ensure access to a variety of transportation options for everyone		X			2, 3, 4	New Mobility Regional Roadmap Initiative established in 2019. This initiative included building a countywide coalition of city, county, council of governments (COG) and other municipal partners to collectively determine the best path forward for managing new mobility (e.g., TNCs, e-scooters and e-bikes) in Los Angeles County and for achieving our regional mobility goals. However, the context and usage of TNCs rapidly shifted upon the onset of the pandemic, particularly with social distancing requirements and stay-at-home orders. Additionally, recent legislation, such as Assembly Bill 5 and its challenge in the courts, has triggered more shifts in the TNC landscape.
Additional Actions							
	Implement “Transit First” Option of NextGen Bus Plan		X			1, 2, 3, 4, 5	Restructuring of service associated with the Next Gen Bus Plan will be implemented by September 2021. A complementary infrastructure program that includes speed, reliability, and layover optimization has been prepared. The Better Bus financial plan, which is currently under development, will include a five-year plan for expediting the Transit First capital improvements.
	Launch Metro Micro, a three year pilot service for short trips that are less suited for conventional fixed-route bus service	X				2, 3, 4	Metro Micro has launched 6 zones and by September 2021, all 9 zones for Metro Micro would have been launched.
	Recovery Task Force issue recommendations to respond to pandemic	X				2, 3, 4, 5	
Goal 2 – Deliver outstanding trip experiences for all users of the transportation system							

Action #	ACTION	C	I	O	N	Related Goals	Notes
Initiative 2.1 Metro is committed to improving security							
33	Update performance measures related to security, benchmarked against best-in-class organizations		X			1, 2, 4	Transit safety and security performance measures have been updated. Metro Board receives monthly updates on these performance measures (compared year-on-year using monthly, semi-annual, and annual periods)
34	Develop and implement employee training program, including outreach to community-based organizations; provide implicit bias training for fare inspectors and officers.		X			2, 3, 5	Employee training program, including implicit bias training, for all new fare inspectors and security officers has been established.
35	Explore and implement prevention tactics; promote prevention as a first measure to reduce frequency and severity of crimes.		X			2, 3, 4	Context-appropriate, unarmed deployments include Transit Ambassador Program and Elevator Attendant Program.
36	Install state-of-the-art video surveillance and access control systems		X			2, 3	Metro received a \$5M federal grant to implement a new video management system.
37	Measure change in perception of safety		X			1, 2, 3	Perceptions of safety is asked in the new comprehensive, annual Customer Experience surveys. The new Public Safety Advisory Committee will explore new ways of addressing public safety, and will help guide a public safety survey.
38	Develop and implement community policing plan		X			2, 3, 4	The Public Safety Advisory Committee will shape the development of a community policing plan, with an initial draft covering LAPD, LA County Sheriff, and Long Beach Police.
39	Develop and deploy program to prevent sexual harassment on system		X			2, 3	Sexual harassment reporting protocol was updated in 2020. "How Women Travel" provided insights to inform decisions. Transit Watch app
Initiative 2.2 Metro is committed to improving legibility, ease of use, and trip information on the transit system.							
40	Transit Access Pass (TAP) card integration across all services	X				1, 2, 4	TAP has expanded its network to 26 County transit systems. TAP Force network, established in 2019, enables connections by third party service providers.
41	Develop plan and implementation process/schedule to align transit information across system		X			1, 2, 3, 4	Metro will issue an RFP for a Nextrip upgrade, critical for supplying accurate data to Transit app and other downstream systems.
42	New mobile app integrating trip information and fare payment for all mobility services in the County	X				1, 2, 4	Transit app, Metro's official app, for trip planning. TAP app integrates trip information and fare payment for 26 transit systems in LA County.

Action #	ACTION	C	I	O	N	Related Goals	Notes
43	Partner with other transit providers to share transit information across all digital signs and mobile platforms for convenient trip planning and transfers across region		X			1, 2, 4	Included in the 2020 Customer Experience Plan
44	Conversion of bus and rail fleets to cellular communications and data systems to improve accuracy of travel time, allow TAP card loading and wireless transfer of data and fares		X			1, 2	Wi-Fi has been installed on the bus fleet. The Rail project is subject to Board approval of FY22 budget request.
45	Establish open payment system for TAP				X	1, 2, 4	Pending the progress of the Fareless System Initiative Study, which could supercede the need for fare payment.
Initiative 2.3 Improve customer satisfaction at all customer touchpoints							
46	Customer satisfaction survey		X			1, 2, 3	A new comprehensive Customer Experience Survey and research methods that obtains customer feedback on over 40 aspects of service is planned annually.
47	Dedicate staff resources to oversee customer experience and develop a comprehensive approach for improving customer satisfaction		X			1, 2, 5	Customer Experience Executive Officer (within the Office of the CEO) was hired in 2020 and delivered the Board-approved Customer Experience Plan, which includes additional hires to support it.
48	Continuous improvement program with measures related to customer satisfaction for all services, benchmarked against best-in-class organizations				X	1, 2, 5	Developing a continuous improvement program is a strategic opportunity (see Goal 5 chapter)
49	Wi-Fi as amenity to all customers		X			1, 2	Metro buses have free Wi-Fi access. Wi-Fi on Metro rail is subject to Board approval of FY22 budget request.
Additional Actions							
	Systemwide Station Design Standards		X			1, 2, 5	
	Transfers Design Guidelines		X			1, 2, 5	
	Better Bus, including bus stop improvements		X			1, 2, 5	
	Accessible wayfinding		X			1, 2, 5	
	Interactive touch screens		X			1, 2, 5	
	Public Safety Advisory Committee		X			1, 2, 3, 4, 5	
	Supportive Transit Parking Program Master Plan		X			1, 2, 3	Metro is able to manage utilization at 20 Metro passenger facilities to ensure customer parking spaces are available throughout the day. The complementary Ridership Verification System ensures that only transit users are utilizing the parking spaces.
	Fareless System Initiative		X			1, 2, 3, 4	

Action #	ACTION	C	I	O	N	Related Goals	Notes
	Uplift the Human Spirit with Metro Art: Beyond Infrastructure		X			1, 2, 3, 5	
Goal 3 - Enhance communities and lives through mobility and access to opportunity							
Initiative 3.1 To lift up local communities, Metro will create jobs and career pathways in transportation.							
50	Implement Workforce Initiative Now-Los Angeles (WIN-LA) Program		X			4	Metro launched WIN-LA in 2017 to create pathways for working-age adults to go into construction, operations/maintenance, administration, and professional services jobs within the transportation industry from population groups that have faced historical barriers. Metro is now developing requirements for contractors to hire WIN-LA program participants.
51	Develop curriculum for Transportation School		X			4	Ground-breaking for the public boarding school took place in October 2020 on a Metro-owned site at the corner of Vermont and Manchester Avenues. The school is anticipated to open in August 2022. Development of the curriculum is underway.
52	Work with federal funding partners to support targeted and local hiring		X			4, 5	Ongoing legislative advocacy effort
INITIATIVE 3.2 METRO WILL LEVERAGE ITS TRANSIT INVESTMENTS TO CATALYZE TRANSIT-ORIENTED COMMUNITIES AND HELP STABILIZE NEIGHBORHOODS WHERE THESE INVESTMENTS ARE MADE.							
53	Develop strategic transit-oriented communities' recommendations for jurisdictions where transit corridors are located		X			4, 5	Metro Board adopted the Transit-Oriented Communities Policy in 2018 and TOC Implementation Plan in 2020. TOC Corridor Baseline Assessments will be undertaken for all Metro transit corridors. Metro will also administer the TOC Grant Writing and Technical Assistance Programs.
54	Incorporate transit-oriented communities' considerations into all new transit corridor plans		X			4, 5	All Metro transit corridor planning efforts include assessments of opportunities and constraints to transit-oriented development.
INITIATIVE 3.3 METRO IS COMMITTED TO GENUINE PUBLIC AND COMMUNITY ENGAGEMENT TO ACHIEVE BETTER MOBILITY OUTCOMES FOR THE PEOPLE OF LA COUNTY.							
55	Develop community engagement strategy in alignment with equity framework in Initiative 1.1		X			4, 5	Metro's Equity and Race Executive Officer is leading the preparation of the Community-Based Organization Partnering Strategy to ensure alignment with the Equity Platform. The strategy is expected to be advanced to the Metro Board in 2021.
INITIATIVE 3.4 METRO WILL PLAY A STRONG LEADERSHIP ROLE IN EFFORTS TO ADDRESS HOMELESSNESS IN LA COUNTY.							
56	Expand Homeless Outreach Program to increase the presence of C3 (city, county, and community) teams as the first point of contact with individuals in need		X			1, 2, 4, 5	Metro Board approved a two-year extension of the C3 team contract (July 1, 2021 to June 30, 2023) and approved funding for a four-month emergency shelter pilot program.

Action #	ACTION	C	I	O	N	Related Goals	Notes
							In April 2020, Metro launched Operation Shelter the Unsheltered, a collaborative effort between Metro Transit Security (Metro-contracted law enforcement partner), the LA County Department of Health Services, The Dream Center, and LA DOOR outreach teams to address heightened numbers of homeless persons at six Metro Rail stations. As of December 31, 2020, Metro and its partners have connected 655 individuals to housing accommodations.

GOAL 4 – TRANSFORM LA COUNTY THROUGH REGIONAL COLLABORATION AND NATIONAL LEADERSHIP

INITIATIVE 4.1 METRO WILL WORK WITH PARTNERS TO BUILD TRUST AND MAKE DECISIONS THAT SUPPORT VISION 2028

57	Align funding program requirements to Metro Vision 2028 Plan goals and initiatives		X			1, 2, 3, 5	Expanding eligibility for Complete Streets projects and prioritizing VMT reduction among proposed amendments to Measure R and Measure M to be brought to the Metro Board. Technical and grant-writing assistance for municipalities for Active Transportation Programs and Transit-Oriented Communities Co-investment in bus stops, as part of the Better Bus Initiative
----	--	--	---	--	--	------------	--

INITIATIVE 4.2 METRO WILL HELP DRIVE MOBILITY AGENDAS, DISCUSSIONS, AND POLICIES AT THE STATE, REGIONAL, AND NATIONAL LEVELS.

58	Develop annual and 5-year legislative strategy on mobility issues				X	1, 2, 3, 5	An annual legislative agenda is prepared every year, but not a 5-year legislative strategy. The latter is a strategic opportunity (see Goal 4 chapter).
----	---	--	--	--	---	------------	---

ADDITIONAL ACTIONS

	Metro Active Transport, Transit and First/Last Mile (MAT) Program, through Measure M		X			1, 2, 3	
	Goods Movement Strategic Plan Freight Working Group		X			1, 2, 3	
	Knowledge Exchange on Technology		X			1, 2, 3	
	NextGen Bus Speed and Reliability Working Group		X			1, 2, 3	
	RIITS data		X			1, 2, 3, 5	
	L RTP and its alignment with the SCAG Regional Transportation Plan		X			1, 2, 3, 5	
	Countywide Zero-Emission Trucks Collaborative		X			1, 2, 3, 5	
	Moving Beyond Sustainability Plan		X			1, 2, 3, 5	
	Phil Washington headed the American Public Transportation Association’s		X			1, 2, 3, 5	

Action #	ACTION	C	I	O	N	Related Goals	Notes
	Mobility Recovery and Restoration Task Force						
	Phil Washington served as Team Lead reviewing the federal Department of Transportation, NTSB, Amtrak, and Maritime Commission		X			1, 2, 3, 5	
	Establishing an alternative to California Environmental Quality Act (CEQA)		X			1, 2, 3, 5	
GOAL 5 – PROVIDE RESPONSIVE, ACCOUNTABLE, AND TRUSTWORTHY GOVERNANCE WITHIN THE METRO ORGANIZATION							
INITIATIVE 5.1 METRO WILL LEVERAGE FUNDING AND STAFF RESOURCES TO ACCELERATE THE ACHIEVEMENT OF GOALS AND INITIATIVES PRIORITIZED IN THE V28 PLAN							
59	Align all of the Metro’s business processes, resources, plans and tools with its strategic plan vision, goals, and initiatives		X			1, 2, 3, 4	A strategic opportunity. See Goal 5 chapter.
INITIATIVE 5.2 METRO WILL EXERCISE GOOD PUBLIC POLICY JUDGEMENT AND SOUND FISCAL STEWARDSHIP.							
60	Develop 10-year Strategic Budget Plan reflecting Metro Vision 2028 Plan goals and initiatives phased in over 10-year period				X	1, 2, 3, 4	A strategic opportunity. See Goal 5 chapter.
61	Use best practices to assess the full life-cycle costs of infrastructure and service investments; identify and share information about trade-offs				X	1, 2, 3, 4	While life-cycle costs are regularly analyzed in capital project studies, a review of best practices has not been initiated. This is a strategic opportunity (see Goal 5 chapter).
62	Regularly evaluate Metro's service offerings to ensure the lowest system impact for the highest gain in mobility		X			1, 2, 3, 4	The NextGen Bus Study is one example of evaluating transit service to improve cost-effectiveness.
INITIATIVE 5.3 METRO WILL DEVELOP A TRANSPARENT DATA MANAGEMENT POLICY CONTAINING POLICIES.							
63	Develop a data management policy containing policies on data access, protection of personally identifiable information and data generated under Metro contracts		X			1, 2, 3, 4	Metro is preparing a data management policy that will, among other features, provide a basic template for departments across the agency to use to structure and manage their respective datasets. A common data warehouse is being explored as a common repository for all data in the agency. This is a strategic opportunity (see Goal 5 chapter).
INITIATIVE 5.4 METRO WILL APPLY PRUDENT COMMERCIAL BUSINESS-PRACTICES TO CREATE A MORE EFFECTIVE AGENCY.							
64	Develop a program of rigorous performance management and continuous improvement across all functions of the organization; look at internal processes to remove unnecessary procedures and decision ladders.		X			1, 2, 3, 4	Potential improvements to the Comprehensive Agency-wide Performance Evaluation system is a strategic opportunity (see Goal 5 chapter).
65	Establish baseline for system performance		X			1, 2, 3, 4	Various dashboards have been created and new ones are being planned. Efforts will be required to coordinate and integrate these

Action #	ACTION	C	I	O	N	Related Goals	Notes
							dashboards (e.g. one comprehensive agencywide dashboard.)
66	Allocate staff and financial resources in annual and 10-year Strategic Budget Plan to lead and administer the performance management and continuous improvement program				X	1, 2, 3	A strategic opportunity. See Goal 5 chapter.

INITIATIVE 5.5 METRO WILL EXPAND OPPORTUNITIES FOR BUSINESSES AND EXTERNAL ORGANIZATIONS TO WORK WITH US.

67	Survey the small business community to assess the impact of changes we make to our processes and procedures		X			3, 4	<p>Ongoing effort (including MetroConnect outreach events, Labor Wage and Retention Program Survey, surveys and working sessions with small business community).</p> <p>Diversity & Economic Opportunity Department conducted a small business survey in January 2021. Survey feedback was used to inform proposed new program enhancements to Metro’s Medium Size Business Enterprise Program and small business programs to increase access to contracting opportunities for disadvantaged business enterprises, small business enterprises, and disabled veterans business enterprises. Ongoing survey and working sessions with the small business community will be undertaken.</p>
----	---	--	---	--	--	------	--

INITIATIVE 5.6 METRO WILL FOSTER AND MAINTAIN A STRONG SAFETY CULTURE.

68	Conduct survey to gauge employee perceptions of safety, security and wellness		X			2	Metro Team Survey administration in 2017, in 2019 and in future years.
69	Develop benchmark and measures for employee wellness		X			2	SMART-MTA-TCU Wellness Program
70	Develop strategies and metrics for improving safety and security for employees		X			1, 2, 3, 4	Various efforts underway, such as the Law Enforcement Service Request for employees.

INITIATIVE 5.7 METRO WILL BUILD AND NURTURE A DIVERSE, INSPIRED AND HIGH-PERFORMING WORKFORCE.

71	Develop and implement supervisor training curriculum to build leadership capacity from within the organization	X				1, 2, 3, 4	Supervisor training program launched in 2021.
72	Streamline and improve processes for recruitments and promotions to focus on hiring the best people	X				3	<p>New friendlier and streamlined online job application system</p> <p>Blind screening of applicants</p>
73	Update onboarding process and curriculum for new employees to incorporate understanding of Metro vision and philosophy	X				1, 2, 3, 4	New employee onboarding process includes a presentation on Vision 2028 from the Senior Leadership Team.
74	Administer Metro Team Survey to gauge employee empowerment and engagement		X			1, 2, 3, 4	Team Surveys were administered in 2017 and 2019. Metro will consider administering future

Action #	ACTION	C	I	O	N	Related Goals	Notes
75	Develop and implement action plan based on Metro Team Survey results		X			1, 2, 3, 4	surveys to track changes in employee perceptions. Detail findings from the 2019 survey have been shared with all managers having direct reports. Each department is responsible for developing and implementing appropriate action plans.
ADDITIONAL ACTIONS							
	\$3 billion in state and federal grants since March 2020, and is currently managing over \$9 billion in grant activities		X			1, 2, 3, 4	
	Section 5309 New Starts and Small Starts		X			1, 2, 3, 4	
	Lobbying effort for COVID relief		X			1, 2, 3, 4	
	Improve cost-efficiency of Metro Bike Share		X			1, 2, 3, 4	
	Unsolicited Proposals		X			1, 2, 3, 4	
	Public Private Partnerships		X			1, 2, 3, 4	
	Transportation Business Advisory Council		X			3, 4	
	Contractor Development and Bonding Assistance Program (CDBAP)		X			3, 4	
	Enhancements to Metro’s Medium and Small Business Enterprise Programs		X			3, 4	
	Professional growth programs: Leadership Academy, EnoMAX, Women and Girls Governing Council		X			1, 2, 3, 4	
	Gender-Balanced Workforce		X			1, 2, 3, 4	

World Class Transportation

A century ago, Los Angeles boasted more than 1,100 miles of streetcar track – the largest streetcar network in the world. Around the same period, Southern California emerged as the first place in the world with mass ownership of motor vehicles. By 1930, there were two registered cars for every three persons in the county.¹⁰ A few short decades later, the streetcar network was gone, and the car solidified its place as the dominant mode of transport. What was seen at the time as world class transportation in Los Angeles County was quickly emulated the world over, and billions now live with the consequences of those decisions.

Fast forward a hundred years later, Metro is committed to prioritizing the movement of people over personal vehicles, and connecting and uplifting communities. Metro’s mission is world class transportation, defined by the three visions of removing barriers to prosperity, swift and easy mobility, and high quality and sustainable mobility options. To achieve world class transportation, Metro will need to implement global best practices.

This Progress Report highlights many initiatives that **are** world class – the NextGen Bus Plan redesign, the Traffic Reduction Study as a step towards congestion pricing, the Transit-Oriented Communities program, the Equity Platform and tools in development, capital projects that allow expanded service on existing routes, and so on.

Sidebar: “American communities could be as good as or better than any other place in the world when it comes to mobility options- we just have to make that choice.” - Pete Buttigieg, Secretary of Transportation, March 2021.¹¹

The figure below shows some other world class transportation outcomes from around the globe, with Los Angeles County data for comparison. Metro does not have to exactly mirror these global practices to be successful. But one of the hallmarks of a world class organization is to learn from peers. Metro’s path to world class transportation will be a product of ongoing improvement of existing services, imitation and adaptation of world class successes, and Los Angeles County’s own brand of innovation.¹²

[Information for world map]

Characteristic	Jurisdiction	Los Angeles County
1. Multi-modal metropolis	In Tokyo (pop 14 million), only 12 percent of trips (all purposes) are by private car. 47% are by rail or bus, 24% walking, 17% cycling. ^{13 14}	In Los Angeles County, 2.9% of trips (all purposes) are on transit, 12% walking, 1% cycling, and 84% by car. ¹⁵
2. Growing ridership by integrating regional land use and transportation planning	For four decades, urban development in Vancouver (pop 2.5 million) has been focused in regional urban centers served by a frequent transit network. ^{16 17} Vancouver was one of the few places in North America to see consistent transit ridership growth over the past 20 years. ^{18 19}	With a population one quarter the size of Los Angeles County, Vancouver’s surpassed Metro’s ridership levels in 2017 (407 million v. 397 million boardings). ²⁰
3. Comprehensive frequent transit network	Seattle (pop 4 million) aggressively expanded its frequent transit network of buses and light rail such that 70% of Seattle households today live within a 10-minute walk to 10-minute or better all-day transit service – a remarkable achievement from a coverage of 25% in 2015. ²¹	In LA County, 9% of residents live within walking distance to frequent transit. The NextGen Bus Plan will increase bus coverage to 22% of residents. ²²
4. Transit used by all social groups	In New York City (pop 8.4 million), residents of all races use transit at shares close to their overall share in the population and the median income of transit commuters is similar to that of all commuters. ²³	Metro’s customer base is disproportionately Latino and African American, and the median household income of all customers is \$19,000, less than a third of the County average. ²⁴
5. Dignified bus stops	In London (pop 9 million), the public transit agency serves 19,000 bus stops and owns	Metro chooses bus stop locations but does not own or control bus shelters. Of the 13,802 bus stops that Metro serves, only

Characteristic	Jurisdiction	Los Angeles County
	12,000 bus shelters (out of a total of 13,000 bus shelters). ^{25 26}	24% are equipped with a shelter for customers to wait for the next bus. ^{27 28}
6. Bus rapid transit networks.	In Bogota (pop 7.2 million), the Bus Rapid Transit network carries over 600 million passengers annually and reduced riders' travel time by an average of 32 percent compared to the pre-BRT bus system. ^{29 30 31}	Metro's Orange and Silver line Bus Rapid Transit routes have a combined annual ridership of approximately 12 million. ³²
7. Frequent trains	In Paris (pop 7.2 million), trains arrive as frequently as once every 85 seconds - more than 40 per hour. ³³	Metro Rail frequency is 4-8 minutes in the peak, and 10-20 minutes in the off-peak.
8. Managed cost of transit expansion	In Seoul (9.8 million), 46 miles of new subway lines are being constructed this decade at a cost of approximately \$180 million/mile. ³⁴	In LA, 11 miles of subway and underground light rail are being constructed at \$949 million/mile. ³⁵
9. Designed for bicycles	In Copenhagen (pop 0.6 million), 62 percent of trips to work or school are taken by bicycle. ³⁶	In Los Angeles County, the cycling mode share is 1 percent. ³⁷
10. Safe streets	In Oslo (pop 0.6 million) there were zero pedestrian or cyclist deaths in 2019, and no children younger than 16 died in vehicle crashes in all of Norway. ³⁸	In Los Angeles County, car crashes are the fourth leading cause of premature death, and disproportionately injure and kill pedestrians and cyclists. In 2017, vehicle crashes in the county injured more than 91,000 people and killed 860 people. ³⁹

Next Steps and Connecting with Metro

We will continue to track the progress of the actions and commitments in Vision 2028. Looking ahead, we will initiate the review of the strategic plan. This will be an opportunity for you to be involved and to help shape the way we live, work, and play in Los Angeles County. We will share with you more information as they emerge. Here are ways to stay in touch with Metro:

Let's chat

Join us quarterly for Metro Conversations and Community Conversations, our quarterly webinar series where Metro talks about our work and communities share their stories, respectively. Sign up for notifications and ways to connect on projects and programs that are of interest to you at [\[weblink\]](#)

Metro Vision 2028 | 2021 Progress Report

Metro[®]

Los Angeles County
Metropolitan Transportation Authority

2021 Report on Progress

What's done and what remains

Metro's mission is to provide a **world-class transportation system** that enhances quality of life for all who live, work, and play within LA County.

2018 – Vision 2028 Adoption

2028 – Vision 2028 Horizon Year

2021 – Today

A horizontal timeline arrow pointing to the right. Three colored dots are placed along the arrow: a blue dot on the left, a purple dot in the middle, and a green dot on the right. Labels are positioned above and below the arrow to identify each point in time.

At a Glance

- Metro has **launched most of the actions** called for in Vision 2028.
- Vision 2028 focuses and coordinates our efforts to move **LA County towards a more multi-modal place to live, work, and play.**
- It will take **time and persistent effort** to reverse 100 years of car-oriented policies and investments.
- A **future update to the plan** can maintain flexibility, and allow for adjustments to goals and strategies.

Progress on Goal 1

Provide High Quality Mobility Options

Progress & Accomplishments

- Measure M
- Long Range Transportation Plan update and capital projects' progress, bus rapid transit, active transportation, and highway projects
- New Office of Equity & Race, and equity tools
- ExpressLanes
- Elevated role of the bus (NextGen Bus Plan and Better Bus program)
- New Metro Micro service
- Fareless System Initiative

Challenges and Opportunities

- Plan and deliver mobility as a system of interlocking parts (draw upon success of NextGen and Better Bus and use similar approach with rail and arterials + highways)
- Deepen partnerships with municipal partners
- Unify all of Metro's pricing policies

Progress on Goal 2

Deliver Outstanding Trip Experiences

Progress and Accomplishments

- Established Customer Experience team in the Office of the CEO and adopted the agency's first Customer Experience Plan
- Introduced flexible ways to access transit information and to pay fares
- Convening the Public Safety Advisory Committee to help re-imagine Metro's approach to public safety

Challenges and Opportunities

- Sustainable funding to fully implement Customer Experience Plan, Better Bus, NextGen Bus, and State of Good Repair
- Establish a community-based approach to enhance security in an equitable way

Progress on Goal 3

Enhance Communities through Mobility and Access

Progress and Accomplishments

- Launched Workforce Initiative Now (WIN-LA)
- SEED School of Los Angeles County
- Launched Transit-Oriented Communities Implementation Plan and updating the Joint Development Policy
- Set partnerships for outreach teams to assist unhoused patrons on Metro system
- Established a Community-Based Organization Partnering Strategy

Challenges and Opportunities

- Take a leadership role in the integration of regional land use and transportation

Progress on Goal 4

Regional Collaboration and National Leadership

Progress and Accomplishments

- Won funding and improved policy through legislative program. \$9B in funding
- Transition to zero-emissions bus fleet
- Planned for recovery with Metro Recovery Task Force and through APTA Mobility Recovery and Restoration Task Force
- National leadership in presidential transition
- Accelerated bus lanes (e.g. Bus Speed Working Group)
- Convened stakeholders (e.g. Freight Working Group)

Challenges and Opportunities

- Build from sustainability plans with bigger role in regional climate action
- Adopt medium-term legislative strategy
- Match actions to policy (e.g. highways, land use, etc.)

Progress on Goal 5

Responsible, Accountable, and Trustworthy Governance

Progress and Accomplishments

- Strengthened career pathways and employee voice at Metro (Leadership Academy, EnoMAX, Metro Employee Surveys)
- Created opportunities for small and medium-size business enterprises
- Harnessed private sector innovation via Unsolicited Proposals, Public Private Partnerships

Challenges and Opportunities

- Establish data and analytics hub
- Short Range Transportation Plan update and medium-term financial roadmap
- Better align budget, organizational structure, and internal processes with Vision 2028
- Manage project costs and benefits holistically
- Retain institutional knowledge and replenish talent

Looking Ahead

- The Progress Report can encourage continued implementation refresh staff and public awareness of Vision 2028
- Vision 2028 provides flexibility for new initiatives and adjustments to achieve Metro's mission.
- Future update to Vision 2028.
